GRANGER HIGH COURSE CATALOG
This booklet provides information about the courses offered at Granger High School. Our highly qualified faculty and staff work diligently to ensure a rich academic experience for every student. Granger is a comprehensive high school, offering a range of courses that are intended to “graduate students who are prepared with college and career-ready knowledge and skills to enter and contribute to the global community as responsible citizens.”

At the beginning of the 2013-2014 school year, Granger accepted ninth graders into its halls. This change has provided ninth graders expanded opportunities and choices as they begin their walk toward college, university and career training.

Parents and guardians, please take some time to review your student’s courses with them to ensure that their high school experience meets their career interests and goals. Grades and performance in 9th through 12th grade count toward college and university applications, so it is important to maintain high performance from the beginning.

High school is an exciting time, full of opportunities for students to engage in learning with great freedom and possibility. It also is a stressful time and a time of challenge. Our hope is that your student will experience tremendous growth and progress at Granger High. By the time they walk across that stage at graduation, we know they will “sing hail to thee, our Alma Mater” as generations of successful Lancers have done.
Visitors
Granite School District’s policy does not allow student visitors on campus or in the classrooms. Students are not to bring friends or relatives with them to attend school. Parents, however, are welcome anytime. When parents arrive, please remember to check in at the main office as per district policy. This measure helps to provide a safe and secure school.

Report Cards and Mid-Term Reports
Report cards and mid-term reports are used to notify parents of a student’s academic standing. Report cards will be given to students approximately one week following the end of each term to hand carry home, with the exception of the fourth term report (June), which will be mailed. Mid-term reports will be marked at the midpoint of the term and the report given to the student. Parents are encouraged to contact the teacher of their student if they have a question regarding either academic or citizenship grades. Grades can be checked at: http://www.graniteschools.org or http://schools.graniteschools.org/Grangerhigh/ - Grades tab.

2nd Term: Monday, October 28, 2019 through Thursday, January 9, 2020 43 Days
3rd Term: Tuesday, January 13, 2020 through Wednesday, March 18, 2020 46 Days
4th Term: Wednesday, March 24, 2020 through Friday, May 22, 2020 44 Days

** School Community Council Voting
STUDENT INFORMATION

ATTENDANCE & CITIZENSHIP POLICY

Call 385-646-5337 to report an absence or to release a student
The responsibility for students’ attendance lies first with the student and then the parent or legal guardian. Therefore, in order to help parents stay better informed, Granger High will provide an automated calling system to report when a student has missed one or more classes. Regular attendance is a prerequisite for academic success. Accordingly, all students at Granger High School are expected to be present and exhibit ON-TIME behavior in all of their classes, every school day.

Students and parents/legal guardians are reminded that absences adversely affect participation grades in their classes. These participation grades may weigh heavily in the determination of final academic grades. Seven or more days of absences, (or equivalent class periods), of excused absences within a school year, are considered excessive and may require a doctor’s note to excuse subsequent absences. Parents and students are expected to excuse absences with the attendance office within one week of the last absence. Absences are excused for the following reasons:

- Personal illness
- Family emergency
- Doctor appointment
- School-related activities
- Vacations (preapproved with an assistant principal)

Students who are absent from school should have their parent/legal guardian notify the school the day of their absence by calling the attendance office at (385) 646-5337. District policy states that notes to excuse absences must be provided within one week of the absence. The note must include the following information: student’s name, date(s) of absence, reason for absence, and the parent/legal guardian’s signature and phone number. Whenever possible, parents/legal guardians are urged to make medical or dental appointments after school hours. Any absence due to a school activity, a signed doctor’s excuse, court, or school suspension, will not count in totals or adversely affect participation grade or citizenship determination.

Students late may receive a truancy fine of $3.00 for each infraction.

ATTENDANCE CHECK-IN & CHECK-OUT
Students who leave school before the end of the day are required to check out through the Attendance Office. This may be done with parent or guardian permission only (a note or a phone call). Students who leave school without properly checking out, are considered truant. Students who are truant may receive a truancy fine of $3.00 for each infraction.

HOMEWORK FOR ILL STUDENTS
To request homework for a student, you may contact the teacher through email. Email address for teachers may be found at http://www.graniteschools.org. You may also contact the Counseling Center at 385-646-5321. Please allow at least two days for homework to be collected and ready for pick up. If a student is absent for an extended period of time, other arrangements or placements may occur.

VACATION POLICY
Any student who will be out of school for more than three days, due to a trip or vacation, must contact the attendance office one week prior to departure in order to complete the excusal form and have their absences excused.

CITIZENSHIP DETERMINATION
A 2.0 cumulative citizenship grade (CPA) is required for a student to participate in graduation ceremonies and receive a Granger High Diploma. The student’s CPA is determined by the following:

Behavior - An uncorrected series of negative behaviors or one serious incident may result in a “0” in citizenship.
Tardiness - On the fourth tardy from any one class, a student will not receive a grade higher than a “1”.

Truancy - truancy is defined as a documented un-excused absence. For one “sluff” the student will receive a citizenship grade no higher than a “1”. For the second “sluff” the student will receive a citizenship grade no higher than a “0”.
 0 - 3 Parent/legal guardian excused absences = Teacher will determine the Citizenship grade of 0 - 4.
 4+ Parent/legal guardian excused absence = Student will receive a “0”. (Four or more days of excused absences within a grading period are considered excessive and will require a doctor’s note or other documentation as requested by school administration to excuse subsequent absences.)

REMEDIATION OF ABSENCES OR TARDIES
Students can remediate current citizenship after school in our Attendance Make-Up Program or past citizenship in our Citizenship Make-Up Classes. A student makes-up citizenship by attending.
1. Truancy fines may be made up with community service at Granger High at a rate of $5 an hour of service.
2. A teacher may also offer the option of citizenship remediation of their own as per their disclosure statement

STUDENT CONDUCT
The behavior policy at Granger maps back to the three principles of behavior and conduct. Each of us at Granger, staff and students, agree to abide by four principles of behavior and conduct. Teachers are expected to teach, model and reinforce these expectations
1) We strive for personal excellence, high achievement, and continuous improvement.
2) We are where we are supposed to be, when we are supposed to be there.
3) We take responsibility for mistakes, fix the problem, and do better next time.
4) We proactively communicate in a mature, constructive way.
5) We maintain high standards of speech, dress, and actions.
6) We demonstrate respect for authority, elders, community members, peers, those different from us, the property of others, and ourselves.
7) We keep promises, maintain honesty, and obey the laws and rules.

DANCES
Date-Type Dances (Prom, Homecoming, etc.) are open to non-student dates, but participants remain subject to all school conduct regulations. One of the attending students must be currently enrolled at Granger High School and provide valid student ID prior to entry. Student ID will be required prior to entry and non-Granger High School students will not be admitted. The administration reserves the right to refuse admission to anyone prior to dances, as well as at the door. All dances will start at 7:00 p.m. and will end at 10:00 p.m. To ensure a positive and safe atmosphere for all students, good conduct is required. Students belongings are subject to search. Those found in violation of this policy will be removed from the dance. If large numbers of students are out of compliance, the administration has the right to cancel a dance at any time. Students must refrain from any dancing that could be described as risqué or vulgar. Dress should be in accordance with the occasion, and the GHS Dress Code will be enforced.
DRESS CODE
Granger High School students are expected to dress in a clean, neat manner that will not take attention away from the learning process. While we want our students to be comfortable, confident, and able to express themselves, there are certain guidelines all students are expected to follow:
1. Appearance should not disrupt classroom activity or bring undue attention to the student.
2. Students must wear shoes or sandals at all times.
3. The following clothing is not acceptable: sagging, short shorts or skirts, belly shirts, low-cut shirts (showing cleavage), spaghetti straps, or any other clothing that would make another student, faculty or staff member feel uncomfortable.
4. Standards of propriety and decency dictate that outer clothing should not reveal underclothing.
5. Slogans or advertisements, which by their very nature are controversial or obscene, are not allowed.
6. Clothing which depicts, through words or images, disrespect toward any race, culture, religion or gender will not be allowed.
7. No clothing depicting criminal activity, violence, weapons, drugs, alcohol or tobacco will be allowed.
8. No gang-related attire. This may include, but is not limited to, the following items as indicated by Utah law enforcement agencies:
   a. Headwear – No unauthorized head gear is allowed at Granger High. This includes but is not limited to hats, bandanas, dew rags, hoodies, etc.
   b. No overcoats, sunglasses, hoods, or clothing that disguises identity or carried items may be worn.
   c. Monikers - no nicknames or gang names on clothing will be allowed.
   d. No Chains or spikes on clothing.

If student is not wearing proper clothing, the student will be issued clothing from the front office or suspended until appropriate clothing is acquired. *The Granger High School Administration reserves the right to make the final determination if an item of clothing is inappropriate or distracting to the learning environment.

ELECTRONIC DEVICE POLICY
Use of cell phones or personal electronic devices during instructional time is prohibited. This includes, but is not limited to, calling out, receiving calls, texting, taking pictures, unauthorized recordings or listening to music. Students caught using electric devices during instructional time will surrender their device to the teacher who may turn it into the office to be returned. On the second offense, the teacher may turn the device into the administration and the parent may be required to come and pick it up. On the third offense, the administration will return device to parent after a parent-student conference. If a student chooses not to give the device to the teacher, the student will be in danger of school and law enforcement consequences. Granger High School is not responsible for any lost or stolen items.

ACADEMIC ELIGIBILITY REQUIREMENTS
Students planning on seeking office or participating in any Utah High School Activities Association- endorsed events should be aware of the listed requirements concerning standards of eligibility. This standard must be met during the term immediately preceding each term of participation and throughout the respective terms of participation. Eligibility is checked at each term end when grades are posted.

GAMBLING AND GAMES OF CHANCE
Any activity or games involving wagering, use of dice, playing cards or other devices, as well as pitching money are prohibited while at school or at any school-related function. Games of chance that do not involve illegal gambling or an exchange of money may be part of authorized school activities.

HAZING POLICY
Hazing or initiation activities on the part of or organizations sponsored by Granger High School are strictly forbidden. Students participating in any activities that might be dangerous or construed as hazing and/or physical or sexual harassment will be disciplined accordingly.
BULLYING POLICY
Bullying is unwanted, aggressive behavior among school aged children that involves a real or perceived power imbalance. This behavior is repeated, or has the potential to be repeated, over time. Bullying includes actions such as making threats, spreading rumors, attacking someone physically or verbally, and excluding someone from a group on purpose. Bullying is not tolerated at Granger High School.

HEALTH INFORMATION
As required by policy of the State Board of Health, all enrolled students must have with the school, a complete record of their immunizations. These are available from the Board of Health. A second MMR shot is required before entering the senior year. It is the policy of the school not to dispense medication to students at school. We advise students who are taking prescriptions that they bring to school only the amount of medication to be taken during the day enclosed in a proper container. Full bottles or packages of medications should be left at home.

HOME INSTRUCTION
For students who are experiencing a serious illness, surgical procedure or are unable to attend school for a period longer than two weeks should contact the student’s counselor immediately. The student’s counselor may be able to request home instruction for the student.

HOME RELEASE
It is Granger’s recommendation that students should carry a full eight-period schedule since the increasing demand in the job market requires students to be better prepared. If a student has a need for home release, please contact the student’s counselor for options. Students may not be on campus during a home release period.

INTERNET
Students and parents may check academic grades, citizenship and attendance, in addition to obtaining school information by accessing the Granite School District home page at www.graniteschools.org. Granger High School students who violate the Granite School Districts Internet Agreement Policy may lose their computer access and/or be subject to disciplinary action.

LOCKERS
Hall lockers are provided for storage of coats and books. The locker is only as safe as the student assigned that locker makes it. Use of a locker by more than one student is unacceptable. To permit other students access to that locker compromises the security of that locker. The lockers are the property of the school. School authorities have the right and obligation to check lockers for the safety, welfare, and protection of students on school property at any time. Every student is responsible for the locker he/she is assigned as well as the contents of the locker at all times. STUDENTS ARE STRONGLY ADVISED NOT TO PLACE MONEY OR OTHER VALUABLES IN THEIR LOCKER. THE SCHOOL DOES NOT ACCEPT RESPONSIBILITY FOR STOLEN OR LOST MONEY, CLOTHING, VALUABLES, OR OTHER ARTICLES.

LOITERING
Loitering at Granger High School is prohibited. Students if not under direct supervision of a teacher or coach must leave the building by 2:45 p.m. Those found loitering are subject to one or more of the following disciplinary actions:
1. Issued a ticket from Granger High School.
2. West Valley City Police Department trespassing ticket.
3. Mandatory parent conference
4. Suspension from school.

PARKING
Student parking on campus is by permit only. All cars parked on campus must display a Granite District parking sticker in the front window. Permits are required and may be obtained in the main office for a cost of $10.00. Vehicles parked improperly out of student areas or without a valid sticker or pass hanging from the rear view mirror may be ticketed, towed, or impounded. Despite school efforts to maintain secure parking for students, the school is not liable for any loss or damage incurred in the parking lot. Failure to purchase a parking pass will result in a ten dollar citation.
SAFE-SCHOOL
Granger High School strictly adheres to Granite School District policies related to Safe Schools, Drugs, Alcohol and Tobacco. Possession of tobacco, alcohol, or drugs is illegal. Tobacco violators will be issued citations. Students involved in drug and/or alcohol situations will be subject to the Granite School District Drug and Alcohol Policy. Violation of both policies (Safe School or Drug, Alcohol & Tobacco) may include, but is not limited to suspension, probation from activities, and enrollment in a treatment program, law enforcement referral, and possible alternative placement. By engaging in these and related activities, a student may relinquish the privilege to attend Granger High School. Complete copies of these Board of Education policies and the sequential steps involved are available at the school upon request. Any student acts of violence, fighting, physical or sexual assaults or threats, possession of a weapon or facsimile, criminal behavior, or any type of gang activity or involvement will be dealt with as per the Granite District Safe Schools Policy.

SEXUAL HARASSMENT
Any form of sexual harassment by staff or students, including any inappropriate verbal, written, or physical conduct is strictly prohibited and violators of this policy will subject themselves to investigative and disciplinary procedures. A more extensive definition of what constitutes harassment is available upon request. Any student who feels they are being subjected to harassment should report the problem immediately to any staff member at the school. Students should not feel embarrassed, intimidated, or reluctant to file a harassment report.

VALEDICTORIAN & SALUTATORIAN
Many college scholarships and special recognitions are closely related to GPA. Certain classes however, are more indicative of intellectual achievement and effort than are others. Therefore, weighing the GPA, ACT, and classes taken collectively will determine Valedictorian and Salutatorian.
2019-2020 SENIOR HIGH SCHOOL
FEE SCHEDULE

In-person, registration will take place in August. Every student will have materials sent to them in July informing them of dates to register. When students come to register on the respective dates, they will need to have enough money to pay for the following fees in cash or check made payable to: Granger High School.

1. **BASIC FEE**
   - Books / Instructional Materials Replacement/Activities* ($30 materials, $10 media/technology, $20 activities, $10.00 refundable at end of year.)* Student activity fees are used to fund activity programs such as: school newspaper, literary magazine, dramas, musicals, concerts, awards, dances, UHSAA sponsored events, and school graduation expenses. $65.00

   - Yearbook (includes sales tax): $40.00 if paid 1st semester, $45.00 (if paid 2nd semester)

* Unrestricted Indirect Cost Rate (Add 13% to participation fee, only, for charter & private school students)

**ADDITIONAL COSTS**

Parents and students should be aware that certain classes and programs may be made available to students that require additional costs that are not a part of the established fee schedule. Some examples of these courses/programs are: Enrichment programs, advanced placement tests, select CTE programs, PSAT (National Merit Testing), SAT, ACT; testing and concurrent enrollment programs that award college credit. Students should obtain information as to those costs when considering their participation. These costs and prices are determined by the sponsoring agency and not by Granite School District or Granger High School.

**FEE WAIVER POLICY**

Granger High School has established policies for fee payments based upon individual needs and situations of students. Arrangements for fee waivers can be made at the time of registration, if students meet established criteria for fee waiver. Eligible students should contact the administration for answers to any questions regarding fee arrangements. More complete information regarding fees and fee waivers will be included in the registration packet each student will receive in July. A fee waiver does not cover the cost of a yearbook, truancy tickets or materials used in courses beyond that which is required to earn a grade. Students have 30 days from the time of enrollment to apply for fee waiver eligibility.
GRADUATION REQUIREMENTS

1. Earn a total of 27.0 units of credit.
2. Pass all the required core classes listed below.
3. 2.0 Cumulative Citizenship Point Average (CPA).

COLLEGE AND UNIVERSITY CONSIDERATIONS

University admissions requirements and NCAA eligibility requirement differ from minimal high school graduation requirements. Students who are planning to enroll in a 4 year university directly from high school will take three years of Math and Science. The three years of math should consist of Algebra 1, Geometry and Intermediate Algebra. The three years of Science should consist of biology, chemistry, and/or physics, and one other science class. Some universities may require two years or more of a world language.

Athletes need to consider additional NCAA Clearinghouse requirements if they are planning to participate in college athletics. If you have any questions, or if you have a need for more information, contact your counselor.

NCAA Initial-Eligibility Clearinghouse (the clearinghouse) is an organization that works with the NCAA to determine a student’s eligibility for athletics participation in his or her first year of college enrollment. Students who want to participate in college sports during their first year of enrollment in college must register with the clearinghouse. Located in Iowa City, Iowa, the clearinghouse staff follows NCAA bylaws and regulations in analyzing and processing a student’s high school academic records, ACT or SAT scores, and key information about amateurism participation, to determine the student’s initial eligibility.

NCAA Division I – If you enroll in a Division I college and want to participate in athletics during the first year, you must: Graduate from high school; Complete these 16 core courses: 4 years of English, 3 years of mathematics (Algebra 1 or higher), 2 years of natural or physical science, 1 extra year of English, math or natural or physical science, 2 years of social science, 4 years of extra core courses (from any category above, or foreign language, nondoctrinal religion or philosophy); Earn a minimum required grade-point average in your courses; and earn a combined SAT or ACT sum score that matches your course grade-point average and test score sliding scale from the clearinghouse booklet.

GRANGER SCHOLAR’S PATHWAY CLASSES

HONORS CLASSES – The following is a list of Honors classes at Granger High School. These classes qualify for the scholars pathway and place a student on the path for college-readiness. The Granger Scholars’ Pathway is a program to prepare high school students to be successful in a post high school academic environment. Qualifying classes are either Honors classes (includes GTI) or A.P. classes. The advantages to being in the Granger Scholars’ Pathway are:

► Quality education
► Distinction at graduation
► Annual certificate and pin awarded to successful candidates at the end of each year.
► Increased number of potential scholarships

CONCURRENT ENROLLMENT (CE) CLASSES
Concurrent enrollment classes are college level classes offered to freshman, sophomores, juniors and seniors for both high school and college credit. Granger faculty members have been approved as adjunct faculty at SLCC to teach these classes Granger high. This credit is transferable to all state-sponsored Utah colleges and universities. Students who enroll in concurrent enrollment classes should be prepared for the rigors of college work. The student will pay a one-time college enrollment fee of $40. The charge for tuition is $5.00 per credit hour and the students will purchase their own textbooks.

Important Considerations:
Salt Lake Community College (SLCC) believes in order for students to be successful in college courses, they must be able to read and comprehend textbooks and materials printed on an appropriate reading level and be able to solve appropriate level mathematics problems. Appropriate test scores from either the ACT or SAT are required for certain college courses. ACT tests are offered throughout the school year, these dates are available on the ACT.org website. Salt Lake Community College also offers Decision Tree Testing at their testing centers and can be used to qualify for classes with prerequisites testing requirements. Students will need to be enrolled at SLCC before they can do the Decision Tree Testing.

First-Time Concurrent Enrollment Students:
Enrollment to Salt Lake Community College will need to be complete before students will be able to register for a concurrent enrollment class.

Continuing Concurrent Enrollment Students:
If you have already taken a concurrent enrollment, classes you do not need do the enrollment again.

**Granite Technical Institute (GTI)**
We encourage all students (9-12) to take advantage of the programs and classes available at the GTI, students who take certain GTI classes will have the opportunity to earn certifications that are widely accepted for employment. CTE classes will assist in career and college readiness. Additional Concurrent Enrollment classes may be available from the GTI. Students who elect GTI classes will travel to and from the GTI campus for two periods, either 1st and 2nd periods or 3rd and 4th periods. Bus transportation will be made available for all GTI classes. Please meet with your school counselor or visit the Granger High career center for more information.

**Advanced Placement (A.P.) Courses**
Advanced placement (A.P.) classes are college level classes that expect students to be prepared for an extensive and rigorous study of the curricular area. Students in these courses can expect 1-2 hours of homework every night. The purpose of these courses is to prepare students for the Advanced Placement exam in May. The successful passage of the class and the test allows students the opportunity to receive college credit. **By signing up for an AP class you must agree to be enrolled in the class for at least 1 semester.**

SEE CATALOG

**Career & Technical Education (CTE)**
Granger High offers over 60 different CTE classes in the areas of Business and Marketing, Family & Consumer Sciences, and Skilled & Technical Sciences. In each of these subject areas, students can earn an Honor Cord for graduation if they complete the CTE Pathway Completer requirements, these credentials are highly beneficial when it comes to applying for college or employment, multiple certificates can be stackable and will strengthen a student’s college and work resume.

Students must complete 6 semesters of coursework (3.0 credits) in a specific CTE area in order to receive the Completer Award. Students can also earn a Concentrator Certificate if they complete 3 semester credits (1.5 credits) in a specific CTE area of focus listed above.

CTE classes at Granger High are connected to national student organizations called Career and Technical Student Organizations or CTSO. Here is a list of national student organizations at Granger: DECA, HOSA, FFA, FCCLA, FBLA, Skills USA and TSA. Each CTSO will have district, state and national competitions, students who are members of these organization are eligible for to apply for scholarships within the CTE areas of focus.
CLASS SELECTION INSTRUCTIONS

FILLING OUT YOUR CLASS SELECTION CARD

Using pencil, select eight periods for the year. Be sure that your name and student # are filled in, and that your parent/guardian signs the class selection card. Obtain teacher’s signature, if required. Students must choose alternate year and semester classes on the card.

9TH GRADERS:
Incoming freshman students, must select a full year of World Geography, Mathematics, Science, English, Freshman Academy and a semester of 9th grade men’s or women’s P.E. and Exploring Computer Science is available to satisfy the Computer Technology credit.

10TH GRADERS:
Incoming sophomores must select a full year of World Civilizations, Mathematics, Science, and English. Also, a student must select for one semester of Fitness for Life, Computer Technology (unless Fitness for Life or Computer Tech. was taken 9th grade year), and Health. Sophomore students must pass Geography and English 9 to register for Drivers Education.

11TH GRADERS:
Incoming junior students must select a full year of United States History, Mathematics, Science, and English. One semester of Physical Education is also recommended and a full year of ACT Prep is strongly recommended for college preparation and for any one pursuing career certification in any area of Career and Technical Education.

12TH GRADERS:
Incoming senior students must select one class of English each semester, and one semester of Government and Citizenship. In addition, seniors must complete all graduation requirements not yet filled.

CHOOSING CLASSES
Granger High School is a Comprehensive Guidance School. Students have the opportunity to work individually with their counselor each year. Students also participate in a variety of career programs including workshops, guest speakers, career fairs, military career day, and college programs. All of these activities are designed to help students create informed CCRP’s, (College and Career Readiness Plan). Careful consideration of the CCRP is recommended as students complete their course class selection information.

Students must choose eight periods for both semesters. Students are selecting classes for the full year. On the basis of student requests, teachers will be assigned for the coming year. Therefore, changes in schedules are strongly discouraged. There will be no class changes after the first two weeks of school.
CLASSES OFFERED AT GRANGER HIGH

ART, DANCE, MUSIC, DRAMA

1.50 credits required for graduation

Art consist of the following four separate cores: Visual Art, Dance, Music, and Theatre. Fine Arts credit and elective credits may be earned from the State Core Classes. Dance classes can also be used as a PE elective.

Visual Art

Students enrolling in Art Classes should expect to have an enjoyable, rewarding and informative experience through classes intended to meet the needs of any student at any level of artistic skill. Beginning art classes are designed for students with little or no art experience. Courses provide a basic foundation and are prerequisites for more advanced classes. Classes are designated Skill Level 1, 2, or 3 (Beginning, Intermediate, and Advanced.) Most classes will require an art fee to cover materials.

Art Foundations II 501201 9, 10, 11, 12 Semester In this course we will learn the elements and principles of design. We will notice and practice how to apply them in a composition of art. We will explore the use of a variety of art tools and materials practicing technique. This class is a studio setting focused on developing higher order of thinking about art, art criticism, art history. Prerequisite for this course is Art Foundations I Fee: $15.00

Beginning Drawing 1 502001 9, 10, 11, 12 Semester This class will give you a solid foundation in drawing. Drawing focuses on black-and-white or monochromatic rendering from life, pictures, masterworks, and imagination. Students will keep a portfolio of finished works and be taught the importance of an artist’s portfolio. The Principles and Elements of Art are reviewed for use in composition and art critiques. Students will learn to talk about, write about, and find meaning in artwork. Fee: $15

Beginning Drawing 1-2 502000 9, 10, 11, 12 Year Do you know drawing is a skill that can be learned? This class will give you a broad range of approaches to art through sketching and formal drawing techniques. Drawing focuses on black-and-white or monochromatic rendering from life, pictures, masterworks, and imagination. Students will keep a portfolio of finished works and be taught the importance of an artist’s portfolio. The Principles and Elements of Art will be reviewed for use in composition and art critiques. Students will learn how to talk about, write about and find meaning in artwork. Prerequisite: Foundations l or ll Fee: $25 (year)

Art 1020 CE (Drawing 1) Skill Level 1 530101 11, 12 Semester An introductory drawing course for non-majors. Line, shape, perspective and light logic will be discussed. Using these techniques, students will develop their drawing skills. Reading and writing are required. Teacher: Matthews *Students desiring college credit must complete the admissions process for Salt Lake Community College by August 15. Prerequisite: None

Drawing 3-4 502300 10, 11, 12 Year Are you looking to push your drawing skills to the next level? This class will help you achieve that goal. This class is designed to increase your individual creativity through problem solving and critical thinking. Technical drawing skills for representational and imaginative drawing will be taught. Various media will be employed. Students will be expected to keep a portfolio of finished works. The Principles and Elements of Art will be reviewed for use in composition and art critiques. Students will review how to talk about, write about and find meaning in artwork. Please note: this class is not suitable for beginners Prerequisite: Drawing 1 Fee: $20 (year)

Ceramics 1 506001 10, 11, 12 Semester Come explore the basic skills needed to construct three dimensional forms in clay. Students will learn wheel throwing and a variety of hand building techniques. Glazing, firing, and art appreciation will also be covered while students produce finished artworks to take home. This course is a perfect follow up after taking 3-D Design. This course fulfills Fine Arts graduation requirements. Prerequisite: 3-D Design. Fee $30 (sem)

Ceramics 2 – Hand Building 506051 10, 11, 12 Semester (The Exciting Clay Sequel to Ceramics 1) This is the perfect class for those students who took Ceramics 1 and want to improve their throwing skills and sculpture techniques. Students will have a degree of artistic choice while they pursue a variety of new and challenging projects and techniques. This class can be repeated and this is encouraged for ceramics 3-4. This course fulfills Fine Arts graduation requirements. Prerequisite: Ceramics 1. Fee: $30
**Ceramics 2 - Wheel Throwing**

506231 10, 11, 12 Semester

(The Exciting Clay Sequel to Ceramics 1) This is the perfect class for those students who took Ceramics 1 and want to improve their throwing skills. Students will have a degree of artistic choice while they pursue a variety of new approaches and projects on the wheel. This course fulfills Fine Arts graduation requirements.

**Prerequisite**: Ceramics 1. **Fee**: $30

---

**Sculpture**

506400 11, 12 Year

In this class we learn about how artists use a variety materials and skills to create three dimensional works of art. We assemble, model, cast and carve. We work in a studio setting focused on the production of masks, figurative sculpture, relief sculpture, model carving, assembling basic shape to construct 3D form, and we display our work in school wide and community events. This is a full year course and we plan a trip to University art studio and a fine art museum.

**Please note**: this class is **not** suitable for beginners. **Pre-requisite**: 3D design **Fee**: $25.00.

---

**Beginning Painting (Watercolor)**

503000 11, 12 Year

This class introduces students to the operations of color and various painting techniques and styles. It is designed to help students utilize such media as watercolor paint, acrylic paint and oil pastels in the rendition of a limited range of subjects. Emphasis will be placed on the elements of art and design. Students will learn how to talk and write about artwork. **Prerequisite**: Foundations I or II; drawing experience helpful **Fee**: $40.00

---

**Painting 1-2 (Oil Painting)**

503100 11, 12 Year

This course will move art students into the next steps of oil painting adding additional techniques and theories to the skills learned in Painting 1-2. Art students will learn more about materials, light and shadow, color theory, and composition techniques. Art students will build on skills developed in Painting 1-2 and practice artistic expression in oil painting. Reading and writing are required. **Prerequisite**: Painting 1-2 **Fee**: $80.00

---

**Advanced Painting 3-4 (Oil painting)**

503150 11, 12 Year

This course will move art students into the next steps of oil painting adding additional techniques and theories to the skills learned in Painting 1-2. Art students will learn more about materials, light and shadow, color theory, and composition techniques. Art students will build on skills developed in Painting 1-2 and practice artistic expression in oil painting. Reading and writing are required. **Prerequisite**: Painting 1-2 **Fee**: $40.00 (sem)

---

**3-D Design 1**

505501 9, 10, 11, 12 Semester

In this class we provide an introduction to a variety of media, we learn and create artwork related to different cultural influences. We develop skills and techniques inspired by cultures of the past and present. This course is designed to develop higher order thinking, while students work in a studio setting. We will look at art technology, art criticism, art history, and aesthetics. We will create meaningful works of art and connect with how people and cultures will perceive our work. We will display our work in school wide, district wide, and community events. The **pre-requisite** for this class is Foundations I and II. **Fee**: $40.00.

---

**AP Studio Art 2-D**

502500 11, 12 Year

This course is not about preparing for a written AP exam. There is no written AP art exam. This course will help the motivated art student create a portfolio of 24 paintings and drawings using various media which will be submitted as the AP exam. Students at Granger have a high success rate of passing the AP Art exam which results in college level credit. Weekly production of art work outside of class and reading and writing are required Fee $80.00 year

---

**Art History AP**

501650 10, 11, 12 Year

This course examines art history chronologically from pre-history through the 21st Century. All major periods are covered, with an emphasis on understanding artworks within the context of historical, social, and cultural traditions. The content of this course includes 40-50% painting and drawing, 25% architecture, 25% sculpture, and 5-10% other media. In addition, the content is broken down as 80% to cover European artworks and 20% dedicated to works in the nonwestern tradition. The course prepares students to take the AP Art History exam.

---

**Dance**

**Dance 1**

500000 9, 10, 11, 12 Year

This beginning class covers dance technique and coordination. Students investigate creative and choreographic processes and dance meaning. **Fee**: $20.00 per semester

**Dance 1 A**

500001 9, 10, 11, 12 Semester

This beginning class covers dance technique and coordination. Students investigate creative and choreographic processes and dance meaning. **Fee**: $20.00

**Dance 2**

500100 10, 11, 12 Year

This class further develops creative skills and dance as a universal language and art form. **Fee**: $20.00 per semester

In addition to increasing the student's appreciating of the stage, this class will emphasize ways in which young people can develop interpersonal communication skills. Students use skills that will help them be successful, including, time management, self-assessment, problem solving, collaboration, and critical analysis. Fee: $10.00 per semester</td>
</tr>
</tbody>
</table>
Advanced Theatre/Theatre 4 520350 11, 12 Year
This year-long advanced, Advanced Placement-like course is designed for students with extensive experience in theatre. This class promotes significant depth of engagement and lifelong appreciation for theatre through a broad spectrum of primarily self-directed study and performance. This class will be competing around the state, representing Granger High School Drama at the Utah Shakespearian High School competition, Utah Theatre Association, and Utah Region and State theatre competition. In addition to increasing the student's appreciating of the stage, they will be participating in a main stage show in the black box theatre. Fee: $25

Film 569751 9, 10, 11, 12 Semester
This class will watch movies in a variety of genres and learn to do a deep analysis of films. We study numerous genres of film (musicals, film noir, suspense, blockbusters, etc.), elements of film (lighting, sound, directing, etc.), and important topics in film (marketing, censorship, propaganda, etc.). Through selected viewings and thorough discussion the student will develop an understanding of the origin and growth of the film industry. Special emphasis will be placed on theme, symbolism, acting, editing, and special effects. Fee: $10

Musical Theatre 520400 9, 10, 11, 12 Year
This year-long course is designed to prepare students to participate in varied aspects of musical theatre, with special attention voice production (ensemble and solo work) stage movement, acting, characterization, dance, musical theatre history, directing, auditioning and technical aspects of a musical production. This course is designed to create a "Triple Threat" in acting, singing and dancing. Fee: $25

Beginning Stage Production and Design 691051 9, 10, 11, 12 Semester
This beginning class allows for students to learn the creative process of design for performances including assemblies, concerts, plays and other outside events. Course work includes designing, creating, and implementing lighting, sound, set construction and stage management. Group work is emphasized. Students will be taught how to work safely in the auditorium and use the tools of the trade. Students will be required to work 4 hours per term in addition to class time on other events being performed at Granger High School. Fee: $15

Advanced Stage Production and Design 691050 10, 11, 12 Year
This advanced class will add to the skills students gained in the beginning stage production class. Students will have the opportunity to play a larger role in the theatrical productions, concerts, assemblies, and other events that take place on the Granger stage. Students in this class will take leadership positions in the stage management of theatrical productions and add to their abilities and resume. Group interaction and work will be emphasized. Students will be taught how to work safely in the environment of the auditorium and using the tools of the trade. Students will be required to work 4 hours per term in addition to class time on other events being performed at Granger High School. Fee: $15

Orchestra, Band, Choir

Guitar 1 508511 9, 10, 11, 12 Semester
This class emphasizes the development of music reading skills and basic guitar skills. Students will learn to play chordal accompaniment and melodies. Students must provide their own acoustic guitar – no electric guitars. $25.00 class fee.

Guitar Ensemble 508550 9, 10, 11, 12 Year
Guitar Ensemble students will perform many styles of music, including classical, pop, jazz, and more. Students taking this class should have had at least one semester of guitar instruction and/or know the fundamentals of guitar technique. Students will perform in concerts and are required to practice at home. Students must provide their own acoustic guitar – no electric guitars. Prerequisite: Guitar 1 or equivalent experience – students must be able to read basic standard notation. Fees: $50 class fee; Uniform fee not to exceed $175.

Percussion Ensemble 508250 9, 10, 11, 12 Year
This class is for all percussion students. Students will learn percussion techniques and play a variety of percussion instruments appropriate for drum line and concert music. Students are required to practice at home. They will perform in concert with the Concert and String Orchestras, Symphonic and Concert Bands, and Pep Band. Students must provide their own sticks and mallets and drum pad. Prerequisite: Students must be acquainted with reading rhythm notation. Fees: $50 class fee; Pep Band uniform not to exceed $50; Concert Uniform fee not to exceed $175.

Concert Band 1-6 509400 9, 10, 11, 12 Year
Concert Band is a fundamentals-based course. All students who play a brass or woodwind instrument are welcome to enroll (percussionists should enroll in Percussion Ensemble, not this class). This course will focus on the basics of musicianship in a band setting. Students are required to practice at home. They will also perform in concert and as the school's pep band with members of Symphonic Band. Students provide their own instruments; only a limited number of instruments are available to rent. Prerequisite: Cadet Band or equivalent experience. Fees: $50 class fee; $75 Instrument fee (if applicable); Pep Band uniform not to exceed $50; Concert Uniform fee not to exceed $175.
Symphonic Band  509500  9, 10, 11, 12  Year
This class for brass and woodwind players (percussionists should enroll in Percussion Ensemble, not this class), and
explores standard and contemporary concert band literature on an intermediate level. Emphasis is placed upon
individual excellence as parts usually have only one or two players per part. Students are required to practice at home.
They will also perform in concerts and festivals and as the school's pep band with members of the Concert Band.
Students should provide their own instruments; only a limited number of instruments are available to rent. Audition
Required with Mr. Moore. Fees: $50 class fee; $75 Instrument fee (if applicable); Pep Band uniform not to
exceed $50; Concert Uniform fee not to exceed $175.

String Orchestra  509610  9, 10, 11, 12  Year
This class provides an opportunity for string players to become acquainted with string music literature. In addition,
opportunity is given to students to work on technique, bowings, and ensemble playing. Students will perform in concerts
and are required to practice at home. No audition necessary. Prerequisite: Cadet Orchestra or equivalent experience. Fees: $50
class fee; $75 Instrument fee (if applicable); Pep Band uniform not to exceed $50; Concert Uniform fee not to exceed $175.

Concert Orchestra  509800  9, 10, 11, 12  Year
This class is for string players and pianists and focuses on refining musicianship with attention to the improvement of
music reading ability and a greater understanding of mood, form and style in symphonic and contemporary music.
Students should provide their own instruments; only a limited number of instruments are available to rent. Audition
Required: Mr. Moore, Fee: $15 / Semester + Black & White formal wear price TBD

Mixed Chorus  510600 Year 510601 Semester  9, 10, 11, 12
Students are encouraged to sign up for a full year but have the option to choose 1st or 2nd semester if a scheduling
conflict is present. This class will prepare students to successfully audition for Concert Choir and then Madrigals. Course
content focuses on correct vocal production, more sensitive musicianship and increased ability to read musical notation.
Fee: $30

Concert Chorus  510900  10, 11, 12  Year
Members of this choir are expected to meet higher vocal and musical standards than those of other vocal groups. Class
content demands more maturity of voice and more refined musicianship with the attention to the improvement of music
reading ability and understanding of mood, form and style in choral music. There are additional fees for costuming and
an optional spring tour. This class requires a successful audition and/or teacher approval. Fee: $30 + uniform (women
$90, men $158) Audition required: Mrs. Santana

Women’s Chorus (Bella Voce)  510560  9, 10, 11, 12  Year
Opportunity for development of vocal skills through the study and performance of music for soprano-alto voices.
Special attention is given to music reading. This class is recommended for freshman and sophomores but not
restricted to them. Selected students may enter 2nd semester. No Audition Required. Fee: $30

Men’s Chorus  510500  9, 10, 11, 12  Year
Opportunity for development of vocal skills through the performance of music arranged for changing tenor and bass
voices. Experience with close harmonies. Special attention is given to music reading. This class is recommended for
freshman and sophomores but not restricted to them. Selected students may enter 2nd semester. No Audition Required.
Fee: $30

Madrigals  510530  11, 12  Year
This is Granger’s most prestigious choir. Students often perform in the community, and the month of December has a
very demanding performance schedule. Students compete with other schools around the state and within the district.
High levels of musicianship are expected and developed. Piano players are welcome, and there is ample opportunity to
do solo and/or small ensemble work. This course teaches all styles of music. Fees apply, including tux or dress costs.
Approximate Fee: $150 women & $205 men Madrigals are required to enroll in Concert Choir. Audition required: Mrs.
Santana

Theory and Harmony AP  507180  11, 12  Year
The study of harmony in this course includes chord structure, tonal music, harmonization techniques, melody writing,
modulation, altered chords, secondary dominants, and seventh chords. The content of the course also includes the use
of repetition, imitation, and sequence in melody writing and provides practice in transposing from one key or clef to
another. The course prepares students to write and arrange music to pass the AP Music Theory exam. Fees: $15
CAREER & TECHNICAL EDUCATION

1.0 credit required for graduation

Career Technology Education (CTE) courses provide in-depth instruction to develop manipulative skills, technical knowledge, and related occupational information to form initial employment and post high school educational opportunities. Courses provide a wide variety of training for workers classified as technical, skilled, semi-skilled, and specialist. CTE courses include Automotive, Business, FACS, Graphics, Photography, Programming, Welding, and Woodworking.

Automotive Repair

Small Engine Repair 627081 9 Semester
This course offers an intensive study of the operation, maintenance, and repair of small gasoline engines. Instructional topics include principles of operation of internal combustion engines, repair and service procedures, and disassembly, overhaul, and reassembly. Instruction may also include the operation of two-cycle and four-cycle engines commonly found on lawn mowers, garden tractors, snow blowers, rotary tillers, chainsaws, and other equipment. Fee: $15.00 per semester.

Auto Mechanics 1-2 627020 11, 12 Year
This course teaches theory and proper procedures of disassembly, assembling, and adjusting mechanical units such as engine, chassis, brakes, and front and rear end assembly. All are hands-on situations. Physics or electronics background is highly recommended. Ability to bring an older auto or truck is not necessary, but if you cannot you must team up with another classmate to get the identical experience. Students will know how to perform basic maintenance. Fee: $20.00 per semester.

Occupational Auto Mechanics 3-4 627140 12 Year
This course is designed for students who plan to enter automotive service field or for those interested in technical and engineering programs. The class includes work and theory in engine repair, engine performance, brakes, suspension and alignment, and electrical systems. Work ethics and productivity are an integral part of the classroom and lab activities of these courses. NATEF requires a minimum number of hours in each area, and the State Office of Education now requires NATEF Certification for funding of the program. Pre-Req: Auto Mechanics 1-2 Fee: $20.00 (sem)

Automotive 3 CE AUTO 1010 627060 12 Year – 2 Pds
Concurrent enrollment credit available through SLCC. This course allows students to continue their automotive experience or to prepare for a future as an automotive technician. Upon completion of class and a passing grade of a "C" or better, you will receive 6 SLCC credits that are transferable to other colleges. This course also works well for those interested in technical/engineering programs in various colleges. Over 85% of class is in the shop repairing and maintaining motorized vehicles. The class will also go to racing events, Salt Flats, and various car shows showing students a different side of the automotive field. See you there!! Fee: $30.00 Prerequisite: General Service Technician (Auto Mech. 2) or conference with Mr. Ballew (Rm.J111) *Students desiring college credit must complete the admissions process for Salt Lake Community College by August 15.

Auto Collision Repair - Beginning 627600 10, 11, 12 Year
If you enjoy working with your hands, have a mechanical aptitude, take pride in your work, and are passionate about cars, then you might consider a career in collision repair. An experienced technician has high income potential, excellent job security and ample opportunities for career advancement within the automotive industry. A 2013 survey from the Collision Repair Education Foundation found that collision repair technicians average nearly $53K income. Almost one in five technicians earned $70K or more, demonstrating the attractive earning potential of the trade. Fee: $30

Collision Non- Structural - Advanced

627221 10, 11, 12 2 pd. 1st Semester
627661 10, 11, 12 2 pd. 2nd Semester
This is a full year, 2 period class for advanced students. Students will learn the material first semester, then work on their own project vehicles second semester. A Non-Structural Technician restores damage exterior panels to their original integrity, function and appearance. This technician uses hand tools and power tools to remove or repair damaged parts, welded as needed, and properly install new parts. Students work with a variety of metals and plastics, as well as glass, electrical, and mechanical parts. Students that pass the I-CAR requirements receive an I-CAR Pro Level 1 Non-Structural Technicians. A Refinish Technician prepares and applies paint to repaired vehicles. This individual works with potentially hazardous materials, so attention to safety and personal protection is essential. Vehicles must be correctly prepared and refinished to ensure proper adhesion, color match, and overall appearance. Students that pass the I-CAR requirements received an I-CAR Pro Level 1 Refinish Technician. Fee: $30 Prerequisite: Basic Auto Collision Repair
Structural Technician 627241 10, 11, 12 Semester
Prerequisite: Basic Auto Collision Repair
A Structural Technician restores vehicles dimensions and structural integrity to collision-damaged vehicles. Students use three-dimensional measuring and straightening equipment to diagnose and return damaged frame or unibody parts to manufacturer’s specifications. Hand tools and power tools are used to remove or repair damaged parts, weld as needed, properly install new parts, estimating damage. Fee: $20

Auto Refinish AR 1100/AR 1110 CE 627671 11, 12 Year
This course is a college course that will fulfill the first requirement in an automotive refinish degree. Students will sand, prime, paint, and finish a car exterior. 2 period block

Business & Marketing
Business and Marketing count as CTE credits. Students must take Business Office Specialist or Exploring Computer Science to fulfill a graduation requirement.

Business Office Specialist 610371 9, 10, 11, 12 Semester
Students will develop advanced skills using Microsoft Office software. Word, Excel and PowerPoint will be the primary focus with opportunities for extension in Access (database software). Students will have the opportunity to become Microsoft Office Certified in Word, PowerPoint, and Excel. The certification is recognized worldwide as the best method for employers to validate computer skill proficiency. Students will integrate applications learned. This course builds on skills included in Digital Literacy. Fee: $10

Exploring Computer Science 642001 9, 10, 11, 12 Semester
Exploring Computer Science is a hands-on course designed to introduce students to programming concepts and problem solving without getting overly technical and prepares students for future programming course. ECS is designed to start from the bottom up, all students, regardless of technical background, will learn foundational concepts in the computer science field. The first part of this course focuses on conceptual ideas of computing and computational practices of algorithm development and problem solving. The second part of this course uses Scratch Programming Language. State Competency Certificate is available. Lab Manual $20.00

Accounting 1 610801 10, 11, 12 Semester
Accounting is the language of business. This is an excellent course for any student looking to prepare themselves for the world beyond high school. This introductory course will take the students through a complete accounting cycle teaching basic accounting skills such as analyzing transactions, cash control systems, the general journal, and the general ledger. It can be used as a math credit toward graduation. State Competency Certificate available. Fee: $35.00

Accounting 2 610811 10, 11, 12 Semester
Prerequisite: Accounting 1
Students will develop advanced skills that build upon those acquired in Accounting I. Students will work with special journals, inventory, payroll, and many other next level accounting processes and skills. State Competency Certificate available. Fee: $35.00 (waived if also taking Accounting 1)

Entrepreneurship 612401 10, 11, 12 Semester
Students will gain an understanding of the marketing and management principles necessary to start and operate their own business. They will develop an awareness of the opportunities for small business ownership and develop the planning skills needed to open a small business. Students will create a business plan for the company they may desire to own and manage in the future.

Exploring Business and Marketing 610001 9 only Semester
Students will learn the basics about organizing and leading a business (leadership, accounting, financing, etc.) They will explore different ways to attract and communicate with customers (marketing). Students will also be able to see if a business is making money (accounting). Finally, students will be able to experience what they study in class by joining FLBA or DECA clubs at school.

Business Management 610761 9, 10, 11, 12 Semester
PEOPLE SKILLS = Money$$$
Want to be the boss that helps others make $$$? That can be you through effective use of:
- Human Relations Expertise,
- Motivational Skills,
- Decision-Making Abilities, and
- Long-Range Planning Knowledge.
The Focus will be on the Four Basic Functions of Management: Planning, Organizing, Directing, and Controlling.
FBLA/DECA participation highly recommended $15/$10 = $25 yearly

GRANGER HIGH COURSE CATALOG
Marketing I  612031  9, 10, 11, 12  Semester

**LET ME MAKE YOU MONEY$$**

You will Develop:
- Soft skills including teamwork,
- Oral communication,
- Written communication,
- Decision-making, and
- Emotional intelligence

To get you ready for careers such as: Healthcare, Hospitality, Travel, Finance, and Management? **Come learn what really matters to be HAPPY in the real world!** FBLA/DECA participation highly recommended $15/$10 = $25 yearly

Digital Marketing  612451  10, 11, 12  Semester

This course provides the student with an understanding of basic marketing principles and training for entry-level job positions in the exciting, constantly changing service fields of advertising and display. Competing successfully as a specialist requires competency in human relations, communications, selling, management, mathematics, and budgeting. One should also understand the appropriate and productive use of display space, television, radio, newspaper, and other media. Specific training helps the student to create, produce, and accurately evaluate the efficiency of the various props, exhibits, and advertising strategies. Fee: $10

Retail Merchandising (School Store)  612311  10, 11, 12  Semester

Students will operate the Granger School Store which will prepare you to operate and run your own business. Students will understand the retail services and assess retail service jobs in the area. **Signature required:** Mr. Pace

Customer Service  612201  10, 11, 12  Semester

The students will gain an understanding of the skills, attitudes, and thinking patterns needed to win customer satisfaction and loyalty. Learn and refine tasks necessary for success in the service industry. Work with local businesses and prepare for job opportunities. Develop service strategies, refine service skills, and gain experience to calmly aid customers in decision making. Students taking marketing classes should have the opportunity to participate in the DECA & FBLA organizations (student marketing leadership associations). DECA-FBLA related activities and curricula can be used as an approved part of all marketing classes. Fee: $10

General Financial Literacy  690801  11, 12  Semester

Financial literacy will provide a better understanding of personal finance as students move into adulthood. Students will be able to make more informed monetary decisions, have a realization of greater potential personal wealth, and create improved financial behavior and habits fostering a stronger local and national economy. Topics include: money management, income and expenses, saving and investing, credit/consumer protection, and risk management. Fee: $10

**Family & Consumer Science**

Adult Roles and Responsibilities  617211  10, 11, 12  Semester

This course focuses on relationships in the family and community. Topics to be covered include: self-awareness, values, goals, decision making, communication, budgeting, family dynamics, dating, engagement, weddings, marriage, and parenting. Fee: $5.00

Child Development  617501  9, 10, 11, 12  Semester

This class focuses on the responsibilities of parenting and the growth and development of children. Areas of study include pregnancy and the development of infants, toddlers, and preschoolers. Students will have the opportunity to simulate the experience of caring for a newborn by taking home a “Real Care” automated baby. Fee: $5.00

Early Childhood Education I  617601  11, 12  Semester

Students will team teach in an on-site preschool lab. They will create and present developmentally appropriate lesson plans to preschoolers. Additional areas of study include child care policies, lab management, guidance techniques, and child-related careers. Fee: $15.00 **Pre-requisite:** Child Development. **Signature Required:** Mrs. Mosher

Early Childhood Education II  617602  12  Semester

These advanced students will be lead teachers and will work with children regularly in the on-site preschool lab. They will create developmentally appropriate lesson plans to preschoolers. Additional areas of study include child care policies, lab management, guidance techniques, and child-related careers. Fee: $15.00 **Pre-requisite:** Early Childhood I.

Early Childhood Education 3  617651  11, 12  Semester

This course provides students with an opportunity to work with children in a professional onsite lab setting and to mentor the Early Childhood Pathway students in the prerequisite classes. Course instruction is a review of the ECE 1 & 2 supported by the State Child Care Licensing Rules. The primary focus of this class is to apply and practice the ECE curriculum and State Child Care Licensing Rules through hands-on, onsite early childhood education training.
Students will also be given the opportunity to complete the steps and to apply for the Child Development Associate (CDA) credential. Experiences include program planning and management; resource and facility management; peer mentoring; supervising recreational and play activities; and preparing, implementing and evaluating learning experiences for children. This course strengthens comprehension of concepts and standards outlined in Science, Technology, Engineering and Math (STEM) education. **Fee:** $10.00  **Pre-requisite:** Child Development, Early Childhood 1 & Early Childhood 2.  **Signature Required:** Mrs. Mosher

**Sewing 1 (Designer Sewing 1) 618401 9, 10, 11, 12 Semester**
Learn to sew for fun. This course introduces students to basic sewing, serging, pressing equipment, and textiles. Students will develop basic construction skills by sewing creative introductory level projects and apparel. Students will need to provide their own fabric for some projects. **Fee:** $5.00

**Sewing 2 (Designer Sewing 2) 618421 10, 11, 12 Semester**
Students will learn more advanced skills using the sewing machine and serger. Intermediate level projects will be constructed. Personal design projects will be a part of this creative class. Students will be required to provide their own fabric for some projects. Fee: $5.00  **Prerequisite:** Sewing 1

**Fashion Design Studio 618501 9,10,11,12 Semester**
This course introduces students to the world of fashion. Students will explore their own personal fashion as they study fashion history, fashion designers, psychology of clothing, elements and principles of design, textiles, and fashion related careers. **Fee:** $5.00

**Fashion Design Merchandising 618521 10, 11, 12 Semester**
This course introduces students to concepts of entry-level business and fashion fundamentals. Students will learn skills in basic fashion concepts, marketing terminology, fashion cycles, retail merchandise, fashion promotion and fashion careers. **Fee:** $5.00  **Prerequisite:** Fashion Design Studio

**Food & Nutrition I 618001 9,10,11,12 Semester**
This course is designed for students who are interested in understanding the basic principles of nutrition and maintaining a healthy life style. Focus will be placed on nutrients and the individual food groups. Students will apply this knowledge in the food lab to follow recipes using grain, vegetable, fruit, egg and dairy products. **Fee:** $10.00

**Food & Nutrition II 618051 10,11,12 Semester**
This course is designed for students who are interested in good nutrition and meal planning throughout life. Emphasis will be placed on knife skills, sauces, consumerism and the food industry. Students will apply this knowledge in the food lab to create salads, soups, yeast breads and pastries. **Fee:** $10.00  **Prerequisite:** Food & Nutrition I

**Food Science 617171 10, 11, 12 Semester**
This course teaches scientific principles and how those principles can be applied to improve the health of individuals and families. Instruction is given concerning the physical, microbiological, and chemical principles that affect the food we eat. **Fee:** $10.00  **Prerequisite:** Food & Nutrition I & II

**Foundations of Nutrition 618191 11,12 Semester**
This course is an introduction to the science of nutrition and the relationship of food intake and health. Nutrient requirements and food selection to meet those requirements are discussed. Students evaluate their own food intake, eating behaviors; learn to be informed consumers of food and nutritional information in our modern environment. Provide students with critical human life and nutrition information that will expand their understanding of science and also be personally applicable to their daily and life-long health and wellbeing in the modern environment through applied assessments, exams, and discussions. It will also serve as the foundation course for subsequent course work in the area of nutrition and satisfy a life science general education course requirement. **Fee:** $5.00

**Human Development 617841 11, 12 Semester**
In this course students will study the fundamentals of growth and development from preconception to old age and death. The domains of physical, cognitive, and social-emotional growth for each age in the life cycle are explored in a variety of contexts. This course is well suited for students interested in studying Early Childhood Education or Psychology in post-secondary fields. **Fee:** $5.00

**Human Development CE 617851 11, 12 Semester**
This course is the concurrent enrollment version of Human Development where students will study the fundamentals of growth and development from preconception to old age and death. The domains of physical, cognitive, and social-emotional growth for each age in the life cycle are explored in a variety of contexts. This course is well suited for students interested in studying Early Childhood Education or Psychology in post-secondary fields. **Fee:** $5.00
Interior Design I  618601  10, 11,12  Semester
This course introduces the elements and principles of design as well as basic considerations of floor plans. Students will develop their creativity as they apply elements and principles in projects. Professional lettering and presentation techniques will be emphasized. Fee: $5.00

Interior Design II  618621  11,12  Semester
This course provides students the opportunity to develop skills in applying the elements and principles of design to interiors. Students will study architecture, furniture styles and constructions, surface treatments and backgrounds, design and function of space and lighting. Fee: $5.00 Prerequisite: Interior Design I

Graphics & Digital Media

Introduction to Graphic Communications  626503  9, 10, 11, 12  Semester
This is a beginning course in graphic communication. This course educates students using Mac computers to run Adobe Illustrator, Photoshop, and InDesign software. Students will learn different design and printing methods. Each student will have a variety of student projects teach basic skills. Projects made in class include: notepads, vinyl stickers, and t-shirts. Graphics is a fun and creative experience for everyone from beginner to expert. Fee: $25

Intermediate Graphic Communications  626600  10, 11, 12  Year
If you liked beginning graphics, this is the next class for you. It’s an intermediate course that builds on what you learned in the beginning graphics class. You will learn more in depth about Adobe InDesign, Illustrator and Photoshop Projects include: Binding, Business Cards, Multicolor Vinyl Stickers and Multi-side T-shirts. This class is an interesting and exciting way to express creativity and develop valuable career skills and make some cool projects. Fee: $35 Prerequisite: Intro to Graphic

Advanced Graphics Communications  626650  11, 12  Year
If you liked beginning and intermediate graphics, this is the next class for you. This third course takes you into the advanced levels of Adobe Illustrator, Photoshop, and InDesign used to produce exciting, professional quality designs, and products. You will have the opportunity to make real life products for customers as well as yourself. Your projects will include: Heat Press (another way of making shirts), Screen Printing, Binding, Banners, Multicolor Vinyl Stickers and Multicolor T-shirts. This class is an interesting and exciting way to express creativity and develop valuable career skills and make some cool projects. Fee: $35

Digital Media 1  640001  9, 10,11,12  Semester
Digital media is the process of analyzing, designing and developing interactive media. Digital Media 1 is the first-year digital media course where students will create and learn digital media applications while using elements of text, graphics, animation, sound, video, and digital imaging for various formats. These abilities will prepare students for entry-level multimedia positions and provide fundamental 21st Century Learning skills beneficial for other occupational/educational endeavors. Fee: $20

Digital Graphic Arts  640021  9, 10,11,12  Semester
Digital media is the process of analyzing, designing and developing interactive media. This is the first-year digital media course where students will create and learn digital media applications while using elements of text, graphics, animation, sound, video, and digital imaging for various formats. Fee: $20

Digital Media 2  640100  10, 11, 12  Year
Digital Media 2 is a course designed to teach the process of planning, instructional design, development, and publishing of digital media and interactive media projects. Digital Media II is the second year course within digital media pathway where students will focus on developing advanced skills to plan, design, and create interactive projects using the elements of text, 2-D and 3-D graphics, animation, sound, video, digital imaging, interactive projects, etc. These skills can prepare students for entry-level positions and other occupational/educational goals. Fee: $20 Prerequisite Digital Media 1

Photography

Basic Photography  628001  10, 11, 12  Semester
You’ve seen those kids with big cameras in the halls: they’re photography students! Sign up! After learning about an aspect of photography or camera operation, you’ll head out to take some photos. Once you return to class, you’ll upload your photos and edit them in Photoshop. Learn how the principles and elements of art can improve your photography. Students will shoot daily image assignments and compete in photo contests. Popular projects include: senior photos, lighting demonstrations, and LED hooping in the Black Box Theatre. Classroom cameras will be available for students use; however, students who own their own digital cameras will enjoy shooting their assigned photos outside of class. The class fee covers access to classroom cameras, prints, studio equipment use, and photographic supplies. This class may be taken again (with written permission). Fee: $15
Advanced Photography  
628031  11, 12  Semester
In Advanced Photography, students learn about the commercial end of photography to prepare for one of the many jobs that involves cameras. Students will apply what they learned in Basic Digital Photography with an emphasis on professional standards and assignments found in commercial photography. Students will also produce a portfolio of work to display on a website at the end of the course. Classroom cameras will be available for student use (and overnight checkout), but students who own their own digital cameras will have an easier time completing assigned work for Advanced Commercial Photography. This class may be taken again (with written permission). Prerequisite: Basic Commercial Photography (or AP-level braininess). **Fee: $15**

### Video Game Development

**Game Development Fundamentals  
641701  9, 10, 11, 12  Semester**
This course is designed to provide students with knowledge and project based experience of fundamental gaming development concepts relating to STEM. These concepts include game design, scripting, creation of digital assets, graphic resources, animations, understanding hardware, problem solving, critical thinking, collaboration, and project management. This challenging, fast-paced class is intended for self-motivated students who are interested in pursuing our new four-year CTE program in game development as either a programmer or an artist. It will expose students to both programming and 3D art creation so that they can make an informed decision on which fork of the program to pursue. **Class Fee: $15**

**Computer Programming 1  
640400  10, 11, 12  Year**
An introductory course in computer programming/software engineering and applications. The course introduces students to the fundamentals of computer programming. Students will learn to design, code, and test their own programs while applying mathematical concepts. Students will learn the C# programming language while creating progressively more complex games in Unity 3D. Students will complete a series of tasks requiring the use of increasingly complex programming structures. This will not only teach them the required programming skills for the course, it will also teach them to use Unity 3D's various features, building a foundation for the more advanced classes to follow. **Prerequisites:** C or higher average in previous year's math and English courses; Game Development Fundamentals (may enroll concurrently) **Class Fee: $25**

**3D Graphics / 3D Animation  
640261 (640211)  10, 11, 12  Year**
3D Graphics / 3D Animation is a full year course. Students will use 3D graphics software to produce 3D models. This course will introduce students to 2D and 3D modeling, the creation and application of textures, mapping, lighting, camera techniques, and rendering of 3D models. This will teach students the technical and creative skills required for the course. Students will also use 3D graphics software to rig 3D models with control skeletons for inverse kinematics and create animations. This course will introduce students to advanced concepts in 2D and 3D, animation planning, storyboard development, and the animation process. This course is part of our 4-year CTE pathway for 3D artists in Video Game Development. Our approach will be focused on hands on applications using Blender, DAZ Studio and Unity 3D (all of which are freely available for use at home, as well). In addition to using key frame animation techniques, students will use both low-end and high-end motion capture hardware to digitize their own movements to create animation. Students will create game art projects to complete a series of tasks requiring the use of increasingly complex 3D modeling and animation skills. Although 3D Graphics and 3D Animation are technically semester long courses. The skills learned in 3D Modeling are required for 3D Animation. To avoid confusion and disappointment we are now offering this as a single block enrollment for both semesters. Students must enroll in both courses to be included, as space is limited. **Class Fee: $25**

**Software Design Video Games  
642200  11, 12  Year**
An advanced course in computer programming/software engineering and applications with a focus on video game design. This course allows the student to explore the topics that interest them by creating a personal plan for research and development and then following that plan to extend the students understanding and mastery. Students will expand their mastery of the C# programming language while creating progressively more complex games in Unity 3D. **Class Fee: $25**

**Graphic Design Video Games  
642220  11, 12  Year**
An advanced course in 3D modeling and animation with a focus on video game design. This course allows the student to explore the topics that interest them by creating a personal plan for research and development and then following that plan to extend the students understanding and mastery. Students will expand their mastery of 3D modeling and animation techniques while creating progressively more advanced projects in Blender and Unity 3D. **Class Fee: $25**
**Video Productions**

**Video Production 1**  
628301  
10, 11, 12  
Semester  
This course is designed to provide an overview and introduction to the three basic phases of filmmaking: pre-production, production, and post-production. This course covers higher-level thinking skills and art-related technology skills. There is an emphasis on the creation of films using electronic media for the school and for individual projects. You can take this course one semester, but we highly recommend you sign up for the full year so you can participate in the film festival at the end of the year. This course is a prerequisite for GTV. **Fee: $20**

**Video Production 2**  
628311  
10, 11, 12  
Semester  
Students are encouraged to take Video Production before taking this class. This course is a follow up to video productions 1 and builds upon principles learned the first semester. Students will continue to work through the three phases of film making and will participate in the end of the year film festival.

**TV Broadcasting - GTV**  
628200  
11, 12  
Year  
This course is the broadcasting class for Granger High. Students will use the three basic phases of filmmaking: pre-production, production, and post-production to produce daily announcements. This course covers higher-level thinking skills and art-related technology skills. There is an emphasis on the creation of films using electronic media for the school and for individual projects.

**Welding**

**Welding Technician**  
627801  
9,10,11,12  
Semester  
Students participating in this course will learn the principals of electric arc welding, gas welding, gas torch cutting, and general welding shop safety. The correct use of welding equipment and technical information concerning the various types of materials will be stress. The students will also learn how to read blue prints and welding symbols. **Fee: $15.00**

**Intermediate Welding**  
627850  
10,11,12  
Year  
Students will continue to practice skills learned in the Welding Tech Entry course. In addition, students will learn and practice the following welding processes: flux core arc welding (FCAW), gas tungsten arc welding (GTAW), and carbon arc air cutting (CAC). Blueprint reading, including weld symbols, will also be studied. Once assigned welds are passed, personal projects may be constructed at student’s own expense. **Fee: $30.00** Prerequisite: Welding Tech Entry. **Pre-req. – Welding technician, Metalworking 1 or teacher approval.**

**Welding Technician Advanced**  
627900  
10, 11, 12  
Year  
This course will prepare students for advanced training in related fields at a University or a technical college. Skills gained will also prepare the welder for an entry level job in the welding industry. The advanced welding course covers SMAW, GMAW, GTAW, oxy/acetylene welding in all positions, brazing, plasma cutting and ACAC gouging. New welding processes are also thought. Welding coupons and individual projects will be constructed to practice welding skills. **Fee: $30.00** Prerequisite: Intermediate Welding or teacher approval.

**Welding CE WLD 1005 CE**  
627970  
11, 12  
Year  
Concurrent enrollment credit available through SLCC. This course will prepare students for advanced training in related fields at a University or a technical college. Students will learn basic principles of the arc and acetylene welding including flat and horizontal welds, brazing and cutting techniques. Pre-requisites: intermediate, advanced and teacher approval. **Students desiring college credit must complete the admissions process for Salt Lake Community College by August 15.**

**Metalworking 1**  
627761  
9,10,11,12  
Semester  
Students participating in this course will learn the principals of electric arc welding, gas welding, and general shop safety. This is an entry-level course in Metalworking. Students create projects using metalworking equipment, tools, materials and technology from various trades. Some of the metalworking processes are sand casting, welding, metal bending, lathing, milling, and plasma cutting. This is a one-semester course of instruction. **Fee: $15.00**

**Woodworking**

**Manufacturing Technology**  
622211  
9  
Semester  
An introductory course focused on the world of manufacturing technology. Students will gain an understanding of how manufacturing technologies impact politics, the environment, society, and the economy. Students will develop a foundation in essential abilities and attitudes that will in turn expand their occupational opportunities in the manufacturing world.
Woodwork 1 625001 9, 10, 11, 12 Semester
This basic woodwork course consists of designing, planning, and using hand and power equipment correctly and safely. Safe practices, design, finishes, and an introduction of the various woods and material available will be emphasized. Students will be required to pay for the wood used on their individual projects. Fee: $15.00.

Woodwork 1-2 625000 10, 11, 12 Year
This is an excellent foundation course for a career in woodworking or construction. It is designed to instruct students in the areas of reading project drawings, knowledge of woods and uses, calculations of materials, numerous joinery designs, wood lamination and project procedures. A major emphasis will be placed on shop safety, proper hand and power tool usage and wood processes. Students will be required to pay for the wood used on their individual projects. Fee: $35.00.

Woodwork 3-4 (Furniture Design/Manufacturing) 625050 11, 12 Year
This woodwork course consists of designing, planning, and using hand and power equipment correctly and safely. This course provides students with in-depth instruction in the woodshop. Students will use practical knowledge needed to work on their own projects and continue with lifelong skills in woodworking. Safe practices, design, finishes, and furniture design and manufacturing will be this courses main purpose. Students will be required to pay for the wood used on their individual projects. Fee: $35.00.

Cabinet Making 1-4 CE CMGT 1200 625100 11, 12 Year
This class prepares individuals to apply technical knowledge and skills needed to create custom cabinets, fine furniture, and architectural millwork. It stresses the safe use of trade hand tools and machinery used in the production of millwork items. Furniture and cabinets, such as kitchens and vanities are constructed, finished, and installed as part of this program. Students will be required to pay for the wood used on their individual projects. Fees: $35.00. *Students desiring college credit must complete the admissions process for Salt Lake Community College by August 15.

Air Force ROTC
AFJROTC 608720 9, 10, 11, 12 Year
This JROTC course is designed for students interested in enriching their high school experience with a pseudo-military experience. Students participate in Aerospace Studies, Leadership Education, physical training, drill, teamwork and uniform/grooming inspections. The program is open to both male and female students and each period has the same curriculum. Continued military service beyond high school is not required. Students will be provided both a PT uniform and an Air Force uniform. Cadets will be required to wear their uniform once a week. There is an expectation that cadets will also participate in one or more of the before/afterschool activities and community service projects to reap the full benefit of the course. Students must provide their own transportation if traveling from another school in the district.

Army ROTC At Taylorsville High School
JROTC 608720 9, 10, 11, 12 Year
The mission of JROTC is to motivate young people to be better citizens. Leadership Education Training 1 (LET-1) is a leadership development course designed to challenge students and prepare them for the ever-changing role of being a leader. Even though the class used a military base structure there is no military obligation or commitment to any military service. The course is open to all students in grades 9-12. Students traveling from other campuses to Taylorsville high school are responsible for their own transportation. The course places students in leadership positions that will require them to teach and train other students. Students will engage in simple and complex problem solving. Students will have to take the initiative and be innovative. As students traverse through the course they will be taught courses in basic life skills, fitness, government, health history, leadership, and management. The teams include, drill, color guard, marksmanship, orienteering, raiders, service learning, pentathlon, adventure, and cyber patriot. Fees: $10.00 per semester
ENGLISH

4.0 credits required for graduation

Utah State Core Curriculum provides the guidelines for selecting materials and developing objectives for high school level language arts course work. The College Board provide the curricular guidelines for the college and university credit courses. **All classes include instruction in writing, reading, listening, speaking and viewing.**

**English 9 Core** 577000 9 Year
This course emphasizes basic core language skills. The course includes the study of basic syntax, conventions, diction and organization to improve writing skills. Several reading genres help students understand writing style and purpose.

**English 9 Honors** 568100 9 Year
Open your mind through the study of world literature. We will use language skills to work on developing students’ ability to clearly communicate thoughts. Students **must be prepared to complete homework each night (around thirty minutes)** to better grow abilities. This rigorous course includes instruction for college-bound students.

**English 10 Core** 568500 10 Year
This course emphasizes basic core language skills. The course includes the study of basic syntax, conventions, diction and organization to improve writing skills. Several reading genres help students understand writing style and purpose.

**English 10 Honors** 568600 10 Year
Open your mind through the study of world literature. We will use skills as we work on developing your ability to clearly communicate your thoughts. If you take this course, you will be thrilled with your growth by the end of the year, but you **must be prepared to complete homework each night (around thirty minutes)** so that we can better help you grow your abilities. This rigorous course and it is a preparatory course for Advanced Placement English.

**English 11 Core** 568910 11 Year
This course emphasizes basic core language skills. The course includes the study of basic syntax, conventions, diction and organization to improve writing skills. Several reading genres help students to understand writing style and purpose.

**English 11 Honors** 568950 11 Year
This course introduces students to American literary works as well as other genres. The course includes instruction in advanced written and oral literary analysis. It is a preparatory course for Advanced Placement English. This rigorous course includes instruction for college-bound students.

**English 12 Core** 569010 12 Year
This course emphasizes literary reading and writing for seniors. The course introduces students to literary analysis through critical reading of several genres. It includes an introduction to advanced essay writing and discussion skills. The course emphasizes reading and writing for students who are considering career options which may include a college or university education. It provides instruction and course work which focuses on vocabulary, research and study skills as well as reading of several genres.

**Advanced Placement English Literature** 569100 11/12 Year
This course includes rigorous instruction and course work for highly motivated juniors and seniors who are interested in taking and passing a test to earn several semester hours of university credit while enrolled in high school. The course emphasizes literary analysis and university level writing skills as well as an appreciation of sophisticated reading of several genres. Students must have excellent writing and reading comprehension skills. Students may earn up to 6 hours of credit with a completion of the course and a satisfactory score on the AP test.

**Advanced Placement English Language** 569150 11/12 Year
This course includes rigorous instruction and course work for highly motivated juniors and seniors who are interested in taking and passing a test to earn several semester hours of university credit while enrolled in high school. The course emphasizes rhetorical skills and analysis and focuses on the many methods writers use to communicate ideas and experiences. Students must have excellent writing and reading comprehension skills.

**English 12 CE (ENG 1010)** 574001 12 Semester
Students must enroll with SLCC to be in this class. English 1010 (Concurrent Enrollment) is the required English course for all college students. You have the chance to take this class while you are still in high school and earn the three credits for English 1010. We will study the necessary college English skills: research, analysis, synthesis, genres of text, and conventions of college English. English 1010 is a rigorous class, but this is a great opportunity to make the necessary transition to college work while still in high school. Fees: Students purchase their own textbook. Pre-requisites: ACT Reading score 20, Accuplacer score 81, or successful completion of English 990. **Students desiring college credit must complete the admissions process for Salt Lake Community College by August 15.**

GRANGER HIGH COURSE CATALOG
English 12 CE (ENG 2010) 574011 12 Semester
Students must enroll with SLCC to be in this class. English 2010 (Concurrent Enrollment) is the second required English course for all college students. If you successfully complete English 1010 (with a grade of C or better), you have the chance to take this class while you are still in high school and earn three more college credits for English. We will continue the study the necessary college English skills: research, analysis, synthesis, genres of text, and conventions of college English. English 2010 is a rigorous class, but this is a great opportunity to make the necessary transition to college work while still in high school. Fees: Students purchase their own textbook. Pre-requisites: Successful completion of English 1010. *Students desiring college credit must complete the admissions process for Salt Lake Community College by August 15.

English Electives

Yearbook: The Shield 569600 10, 11, 12 Year
Help build the yearbook! Those after-school activities? Yup—you’ll go to games, dances, club meetings, plays, etc. As a staff member, you MUST photograph after-school activities. You’ll take pictures, interview students, and help build yearbook pages. You’ll tell the story of the entire year in our yearbook: The Granger Shield. This project involves ACTUAL deadlines that might require after-school participation. The class fee covers field trips, notepads, lots of pens, and access to expensive cameras for after-school use. Fee: $15

Newspaper: The Tri-Color Times (Journalism) 569500 9, 10, 11, 12 Year
Join the newspaper staff as a reporter! With notebook in hand, you’ll interview students from around the world for Granger’s newspaper: The Tri-Color Times. You’ll shoot fantastic, story-telling images. You’ll write and edit and write and publish. Maybe you’ll go undercover to expose the corruption and madness lurking in Granger’s crazy halls! You’ll blog. You’ll update. You’ll tweet. You’ll even text. Text? Text!!! In class! Yay! Start following us on Instagram: Instagram.com/tricolortimes—3000+ students at Granger High School want the truth, and they’re counting on you to deliver. The class fee covers field trips, notepads, lots of pens, and access to expensive cameras for after-school use. Fee: $15

Literary Magazine 569480 10, 11, 12 Year
Students will participate in creative writing.

Professional Reading and Writing 569300 12 Year
This course is considered—Real writing for the Real World: Technical and Professional Communication is a course designed for senior students planning on entering the workplace upon graduation. Students learn how to communicate in a workplace setting, how to properly send emails and communicate over IM, and how to produce documents commonly used in the workplace. Using a group learning model, students use case studies and service learning projects to learn the various types of workplace communications that will help them be successful in their careers.

Debate 1-2 570700 9, 10, 11, 12 Year
This is a beginning class for those interested in the fundamentals of speech and debate. The course focuses on public speaking, argumentation, and competitive debate. Students will have the opportunity to participate in interscholastic tournaments and be a part of the GHS debate team. Fee: $60

Debate 3-4 570730 10, 11, 12 Year
This is an advanced class to prepare students for competition in debate who have already participated in Debate 1-2. Students will have the opportunity to participate in interscholastic tournaments and be a part of the GHS debate team. Fee: $40

General Fiction I 570901 9, 10 Semester
Do you like to explore other worlds, other people, other realities? Do you want to challenge your brain, imagination, and intelligence? Do you want to increase your knowledge of culture, history, worldviews, and new ideas? Do you want to be inspired? Then this is the course for you. The fact is, reading makes you smarter AND…it is FUN. Join this class and you will be joining others who enjoy reading, discussing, and delving into the world of fiction.

General Fiction II 570902 11, 12 Semester
According to Emily Dickinson, fiction is a boat to “take us lands away” without having to pay for the trip! Come visit places you’ve always dreamed of going or nightmares you hope you’ll never have. Explore the great fiction of the world (and what makes it great!) in this class where our main purpose is to read and talk about what we read with others. Books open the door to knowledge, break the chains of ignorance, and feed the belly of curiosity. Join this class and let’s take a journey together!
Humanities CE (HUM 1100)  574301  11, 12  Semester
Humanities is the study of what it means to be human. This course is designed for the inquisitive, mature student. The course invites students to see, hear, and feel humankind’s artistic products and philosophical approaches which illuminate our relationship to deity, others, self and government from past to present. We will explore the themes of faith, myth, war, freedom, marginalized voices, man, nature, romantic love, divine love, and death as they have been interpreted over time in architecture, art, dance, film, literature, music, philosophy, and religion. The reading in this course is rigorous so students must be willing to develop their skills in critical thinking and analytical reading. This course offers high school credit in English and concurrent college credit for three semester hours in Humanities. Students must purchase college texts. *Students desiring college credit must complete the admissions process for Salt Lake Community College by August 15.

Reading Fundamentals  570000  9  Year
Reading Fundamentals is offered to 9th grade students who score as “intensive” or “strategic” at-risk based on their spring Scholastic Reading Inventory (SRI) assessment. This course focuses on fundamental reading skills, including reading strategies, vocabulary development, reading fluency, and critical-thinking skills. Students will have many opportunities for applying reading strategies before, during, and after each text to prepare them for college and career level reading. “No skill is more crucial to the future of a child, or to a democratic and prosperous society, than literacy.” - LA Times, “A Child Literacy Initiative for the Greater Los Angeles Area”

Effective Communications CE (COMM 1010)  574201  11, 12  Semester
This concurrent enrollment class will teach communication principles and practice applied in dyadic, group, written, electronic, and oral presentation assignments. Listening, perception, verbal clarity, nonverbal, diversity, conflict management and interviewing in workplace and interpersonal settings. This class will give you 3 hours of college credit and this is a required class in every school around the country. Get it done in high school. *Students desiring college credit must complete the admissions process for Salt Lake Community College by August 15.

Public Speaking CE (COMM 1020)  574251  11, 12  Semester
This SLCC concurrent enrollment class will focus on preparing and delivering speeches for civic and professional occasions. Basic theory and skills practice, including audience analysis, anxiety mgt, critical listening, supporting claims with evidence, persuasion, motivation, delivery. This class will give you 3 hours of college credit and this is a required class in every school around the country. Get it done in high school. *Students desiring college credit must complete the admissions process for Salt Lake Community College by August 15.

Writing Lab  692000  9, 10, 11, 12  Year
The purpose of the Writing Lab course is to improve students’ writing skills, offer students authentic tutoring and editing experiences, and prepare students for college and career writing, as well as teachers or editors. This course is a prerequisite to working in the writing lab, where all students enrolled would work with Granger's student body to help them increase their writing skills. After students complete the course, they may continue gaining service hours by volunteering in the writing lab or by becoming a writing-lab assistant director. This class is designed as a service-learning course for elective credits.

MATHEMATICS

3.0 credits required for graduation.
Passing grades in Secondary 1, Secondary 2 and Secondary 3 required.
Honors Program in Mathematics prepares students to complete AP Calculus or AP Statistics in senior year.
Freshmen – Secondary Math I or Secondary Math I Honors
Sophomore –Secondary Math II Honors
Junior – Secondary Math III Honors
Senior – Calculus, Calculus/Physics AP or Statistics AP.

Secondary I  577000  9  Year
Students in Secondary Mathematics I focus on linear and exponential relationships, congruent figures, reasoning with equations, and interpreting data. Additionally, students will make connections between algebra and geometry through coordinates.

Secondary I Honors  577100  9  Year
Students in Secondary Mathematics I focus on linear and exponential relationships, congruent figures, reasoning with equations, and interpreting data. Additionally, students will make connections between algebra and geometry through coordinates. Honors will also cover Vector quantities and operations on vectors as well as matrices operations and applications. Students who continue in the honors track will be prepared for Advanced Placement Calculus their senior year of high school.

GRANGER HIGH COURSE CATALOG
**Secondary II** 577200 10 Year
The focus of Mathematics II is on quadratic expressions, equations, and functions; comparing their characteristics and behavior to those of linear and exponential relationships from Mathematics I as organized into 6 critical areas, or units. The link between probability and data is explored through conditional probability and counting methods, including their use in making and evaluating decisions. The Mathematical Practice Standards apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations. Fee: $10.00 workbook

**Secondary II Honors** 577400 10 Year
This course is the same as Secondary Math 2 but at an accelerated pace so that more Pre-Calculus ideas can be incorporated in. A student taking the honors courses all three years will be ready to take Calculus as a senior. Prerequisite: Secondary Math 1(Honors)

**Secondary III** 577500 11 Year
This class is designed to present an integrated approach to Intermediate Algebra, trigonometry and pre-calculus. It will continue on principles touched upon in secondary II and increase students understanding of higher level math. This class is counts as the third year math requirement for graduation. The Mathematical Practice Standards apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.

**Secondary III Honors** 577600 11 Year
This accelerated class is designed to present an integrated approach to Intermediate Algebra, trigonometry and pre-calculus. This class is counts as the third year math requirement for graduation. The Mathematical Practice Standards apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.

**Math Decision Making for Life** 579660 11, 12 Year
This course includes mathematical decision making in finance, modeling, probability and statistics, and making choices. The four quarters of instruction will be independent of each other, allowing students to enter and exit the course quarterly. Students will make sense of authentic problems and persevere in problem solving. They will reason abstractly and quantitatively while communicating with others. Students will use appropriate tools, including technology, to model mathematics.

**College Prep Math** 579750 12 Year
College Prep Math formalizes and reinforces concepts learned from Math 1, 2 and 3 to provide students with the skills and understanding to succeed in College Algebra (Math 1050) Students that are planning on going to college, but did not do well in Math 1 2 and 3 should take this class. It will also help prepare you to take the ACT Math test. Prerequisite: Math 3 or Math Decision Making

**Math 1030 Intro to Statistics CE** 580041 12 Semester
This course is a concurrent enrollment class that includes descriptive and inferential statistical methods. Emphasis on sampling design; descriptive statistics; linear regression and correlation; probability; sampling distributions; hypothesis testing and confidence intervals. Course is recommended particularly for students in programs desiring statistical literacy, including (but not limited to) Social Science, Behavioral Sciences, and Nursing. $15.00 online workbook fee. *Students desiring college credit must complete the admissions process for Salt Lake Community College by August 15.

**Math 1050 College Algebra CE** 580101 12 Semester
The course is an algebra class designed to prepare students to enter either engineering or calculus courses. It continues to explore, in greater depth, standard algebra topics many of which were addressed in Math 1010. College Algebra satisfies quantitative literacy requirements for graduation. Students not intending to take calculus should investigate 1030, 1040, 1090 as alternate courses that satisfy the literacy requirement. Prerequisite: a 23 math and 18 reading ACT score. $15.00 online workbook fee. *Students desiring college credit must complete the admissions process for Salt Lake Community College by August 15.

**Math 1060 Trigonometry CE** 580151 12 Semester
This course is intended to prepare students for a comprehensive course in calculus by teaching concepts and facts required for a major in math, physics, chemistry, engineering, and computer science, as well as many of the life sciences. The course presents trigonometric functions, polar functions, trigonometric equations, and solutions of right triangles and oblique triangles. Polar coordinates, complex numbers, and vectors are also introduced. Students are required to know basic trigonometric facts. Prerequisite: Math 1050. $15.00 online workbook fee. *Students desiring college credit must complete the admissions process for Salt Lake Community College by August 15.
**Introduction to Statistics** 579500  12 Year
This class is a non-calculus based statistics course. The purpose of the course in statistics is to introduce students to the major concepts and tools for collecting, analyzing and drawing conclusions from data. Students are exposed to four broad conceptual themes: 1- Exploring Data: Observing patterns and departures from patterns, 2- Planning a study: Deciding what and how to measure, 3- Anticipating Patterns in Advance: Producing models using probability and simulations, and 4- Statistical Inference: A Graphing calculator with statistical applications will be required.

**A.P. Statistics** 579520  11, 12 Year
This course is an Advanced Placement course that explores the ideas of probability, statistics and analysis of mathematical data. This course is for a college bound student who is not intending to take Calculus. Upon passing the AP test, a student may receive up to 8 semester hours of college credit (depending on the accepting institution). This course may be taken at the same time as Math 3, AP Calculus.

**A.P. Calculus AB** 579350  12 Year
This is an Advanced Placement course covering the 1st semester of college level Differential and Integral Calculus. Topics include limits, continuity, differentiation, and integration with selected applications. Upon passing the AB advanced placement test, students may receive up to 8 semester hours of college credit, depending on the university. Prerequisite: Math 1050/1060, or Secondary Math 1 Honors, Secondary Math 2 Honors and Secondary Math 3 Honors. Note: Students taking this course should sign up for the Calculus Independent Study class.

**A.P. Calculus BC** 579360  12 Year
This is an Advanced Placement course covering the 1st and 2nd Semester of college level Differential and Integral Calculus. Topics include limits, continuity, differentiation, integration, series, parametric and polar equations, and selected applications. Upon passing the BC advanced placement test, students may receive up to 8 semester hours of college credit and a higher class placement depending on the university. Prerequisite: Honors Secondary 3 or Math 1050/1060. Note: Students taking this course should sign up for the Calculus Independent Study class.

**Calculus Independent Study** 579440  12 Year
This is an optional course but is strongly suggested. This course allows students more time to work on their Calculus and to get extra help. Time will be spent on clarifying and exploring concepts taught in the regular class.

**PHYSICAL EDUCATION & HEALTH**

**.50 credit of Fitness for Life required for graduation**

**Fitness for Life** 606301  9, 10 Semester
This course is designed to help each student become involved in and adopt a personal lifestyle of regular physical fitness. Students will understand fitness components including weight control, caloric expenditure, heart rate, and stress management.

Fee: $10.00  Must pass Fit. for Life before Lifetime Sports or Weight Training.

**.50 credit of Health required for graduation**

**Health** 607801  9, 10, 11, 12 Semester
Students study concepts that deal with the emotional, mental, physical, social and environmental well-being of an individual. Habits and practices are discussed that will contribute to living a healthy lifestyle.

**P.E. Electives**

1.0 credit required for graduation
Dance classes may also be used as PE elective credit.

**Participation Skills & Techniques** 606201  9 only Semester
Boys 606202
This one semester class is designed to offer an introductory level of instruction in individual, dual or team sports. Daily participation and appropriate dress is required. Fee: $10.00

**Weight Training 1-4** 606802  11, 12 Semester
This physical education class is geared towards muscular strength, muscular endurance and overall body composition. Students must be self-motivated and want to work hard. Prerequisite: Fitness for Life. Fee: $10.00

**Female Only Section - Weight Training** 606803  11, 12 Semester
This physical education class is geared towards muscular strength, muscular endurance and overall body composition. Students must be self-motivated and want to work hard. Prerequisite: Fitness for Life. Fee: $10.00

GRANGER HIGH COURSE CATALOG
### Aerobics 607201 9, 10, 11, 12 Semester
This class is for conditioning and weight loss. It develops physical fitness and endurance. This includes aerobics, Pilates, yoga, muscle focus, conditioning, jogging, relaxation, and Zumba. This will help students with weight control and self-esteem. **Fee: $10.00**

### Lifetime Sports 1-2 606401 10, 11, 12 Semester
Students develop skills in a variety of lifetime activities such as Basketball, bowling, soccer, volleyball. **Prerequisite:** Fitness for Life. **Fee: $10.00**

### Water Aerobics 607081 9, 10, 11, 12 Semester
This is a cardiovascular workout done inside the water. No swim or exercise experience is necessary to take this course. **Fee: $10.00**

### Swimming 1 607002 10, 11, 12 Semester
This class offers basic swimming skills for the intermediate swimmer. This class is organized to teach student stroke development, diving and lifesaving activities while providing an alternative in water workout with some fun along the way.

### Swim Team 607060 9, 10, 11, 12 Year
This physical education class is organized to teach students stroke development, diving, and life saving activities. Students are participants on the Swim Team.

### Cheerleading 607570 9, 10, 11, 12 Year
Cheerleaders for sophomores, junior varsity and varsity are selected through auditions and chosen by a panel of judges. The class is for elective credit only. **No Physical Education Credit is available.**

### Football Competitive Athletics 606630 9, 10, 11, 12 Year
Athletics is a special program organized within the school for football players only. It is an elective course which includes the students who wish to play on the school's football team. **Prerequisite:** Only students participating in football may be in the class and must also have a 2.0 GPA and no more than one F letter grade. **Fee: $10.00**

### ATHLETICS VARSITY 9, 10, 11, 12 Semester
**Men's Athletics – 4A**
606603 Fall 606604 Spring
**Women's Athletics – 4B**
606601 Fall 606602 Spring
Athletics is a special program organized within the school. It is an elective course which includes the students who wish to play on the school's competitive athletic teams. **Fee: $10**

**WEIGHT TRAINING & CONDITIONING 5-6 606806 9, 10, 11, 12 1st Semester**
(Football Team) 606807 9, 10, 11 2nd Semester
This physical Education class is designed to enhance muscular strength, muscular endurance, and overall body composition. Students must be motivated and willing to work very hard. This class will also be used for in-season and after season conditioning and preparation. In-season workouts are mandatory for football. You must be on the football team and in good standing academically to be registered for this class.

### SCIENCE
3.0 credits required for graduation

**Biology 1-2 601010 9 only 601000 10, 11, 12 Year**
Biology exposes students to a wide range of biological science topics such as the characteristics of life, cellular processes, genetics, evolution, and ecology. This course is designed to meet the diversified needs of students who require biology for future employment or education. **Lab Fee: $15.00**

**Honors Biology 601100 9, 10, 11, 12 Year**
This course will cover all the basic concepts learned in Biology 1-2 in greater depth and at an accelerated pace. It is designed for the student who is looking for an academic challenge or those intending to enroll in A.P. Biology. **Lab Fee $15.00 per semester**
AP Biology 601200 11, 12 Year
This course is equivalent to freshman biology at the university. The principles of molecular and cellular biology, organisms and their structures and functions, populations, and their continued existence will be studied. Up to six semester hours of college credit may be given upon passing of the Advanced Placement Examination. **Prerequisite:** B or better in Biology 1-2, B or better in Honors Biology, B or better in Chemistry Lab Fee $15.00

Wildlife Biology 602851 9, 10, 11, 12 Semester
This course is designed to discuss the interaction between humans, wildlife, and the environment. First semester emphasis is placed on conservation, ecology, speciation, and dinosaurs. Second semester emphasis is placed on the interesting details of certain animal classes and groups such as mammals, marine, reptiles, insects, and birds. **Fall – Environment; Spring – Wildlife. Fee: $15.00 per semester.**

Forensic Science 602881 10, 11, 12 Semester
Forensic Science is an introductory course in which students will have the opportunity to explore how scientific principles are used in analyzing physical evidence found at crime scenes. Students are introduced to the wide array of career choices in forensics. The fundamental objective is to teach the basic processes and principles of scientific thinking, the Scientific Method, through crime scene investigation so as to apply them to solving problems. The focus will be to introduce students to some of the specialized fields of forensic science, the principles of science and technology upon which they are based, and the application of these principles to various analyses of crime scene evidence. **Fee: $15**

Chemistry 601500 10, 11, 12 Year
Chemistry is the study of matter its properties, energy and changes. Topics covered include atomic theory, equations, the states of matter, equilibrium and applications of chemistry in society. This is the introductory course with an emphasis on qualitative observations and mathematical relationships. Students should be concurrently enrolled in Secondary Math -1 or have successfully completed Math I. **Fee: $15.00 per semester**

Chemistry Honors 601600 10, 11, 12 Year
This is a basic Chemistry course that is designed for the college bound student. The course will cover atomic theory, reaction types, equilibrium, kinetics and other principles of Chemistry. Importance is placed on chemistry's qualitative and algebraic relationships. Students should be concurrently enrolled in Honors Secondary Math II or have successfully completed Honors Secondary Math II. **Fee: $15.00 per semester.**

Chemistry AP 601700 11, 12 Year
This course is equivalent to a freshman chemistry course at a university. The principles of chemistry are covered in depth with extensive use of mathematics. The course is split into two periods and includes a lab portion. Successful completion of both this course and the advanced placement examination may result in the award of up to six semester hours of credit by some colleges and universities. Students will need to plan on 1-2 hours on homework or independent study in the evenings. **Prerequisites:** Chemistry 1-2 H or Physics AP (B). Teacher Approval: Banks/Pluim/Rechsteiner. **Fee: $10.00 Lab**

Chemistry CHEM 1010 CE 603520 11, 12 Semester
This concurrent enrollment class is designed for students who want to obtain a basic understanding of chemistry and to also learn the concepts of modern chemistry. Chemistry is the study of matter, its properties, energy and changes. Topics covered include atomic theory, equations, the states of matter, equilibrium and applications of chemistry in society. **Prerequisites:** Chemistry 1-2 H or Physics AP (B). Teacher Approval: Pluim/Rechsteiner. **Fee: $10.00 Lab Fee:** $40 registration fee through SLCC. *Students desiring college credit must complete the admissions process for Salt Lake Community College by August 15.*

Earth Science 600800 9 only Year
This yearlong course explores concrete scientific ideas of the Cosmos and the theory of how the Universe began, the Earth and its change over time, the water cycle and its critical components, weather and major events, and conservation of the Earth's precious resources. Major units are astronomy, geology, hydrology, meteorology, and conservation.

Earth Science Honors 600950 9 Year
This full year honors course is designed for college bound and highly motivated students. This course will cover the basic concepts learned in Earth Systems, but to a greater depth and at an accelerated level. It is designed for the advanced students who are looking for an academic challenge and are naturally curious about the world around them. Fee: $15

Environmental Science 602561 10, 11, 12 Year
Environmental Science is a multidisciplinary field of study that integrates physical and biological sciences. In this class we will be studying the environment though the lenses of biology, chemistry, physics, geology, ecology, zoology, mineralogy, atmospheric science, economics and sociology. We will be using case studies to further the application of theoretical concepts. Students will use the concepts learned from the class to do a research project on an environmental problem of their choosing for their final project.

<td>This class studies the Cosmos. Topics include scientific ideas of how the Universe began, changed, and its possible futures. In building an Astronomy notebook, students will come away from the course with an Astronomy book of their own making. We will research the formation of galaxies, life cycle of stars, formation of the solar system, and the sun/earth/moon system. The course ends with discussions of the future of human exploration of nearby and outer space. Additionally, we will discuss current ideas of how the universe will end, relativity, and humankind’s greatest discoveries and inventions. <strong>Suggested pre-requisite:</strong> Earth Science.</td>

**FRESHMAN SUCCESS**

**Freshman Success** 691170 9 Year  
Required course: This course will equip students with the knowledge and skills they need to succeed in high school and graduate ready for college, career and life. Students will learn how to navigate the high school system and how to monitor their progress toward graduation. The course will focus on life-skill development, academic planning, and information on all of the options, opportunities and resources available to ensure high school and future success.

**SOCIAL STUDIES**

3.50 credits required for graduation
All high school students are required to complete Human Geography, World Studies, American Studies and a semester of American Government. Several elective courses are offered which fill the requirement for an area of distinction for a Diploma of Merit in Social Studies. Twelfth-grade students are encouraged to take as many elective classes as their schedules permit. Eleventh-grade students may take elective classes in addition to American Studies.

**Geography for Life** 584000 9 Year  
This course is **required for graduation**. This course focuses on the interaction between our physical and cultural environments. Students study the six themes of human geography including location, place, movement, region, human interaction, and interaction with the environment.

**Honors Geography** 584100 9 Year  
Students will learn about the five themes of location, place, human environment interaction, movement and regions. Students will work at a quick pace and have increased homework, including outside of class research. Students should be self-motivated with a desire to participate in group discussions.

**AP Human Geography** 584200 9 Year  
This course introduces students to the systematic study of patterns and processes that have shaped human understanding, use and alteration of Earth’s surface. Students learn to employ spatial concepts and landscape analysis to examine human socioeconomic organization and its environmental consequences. Students also learn about the methods and tools geographers use in their research and applications. Students who earn a qualifying score on the AP Exam receive college credit.

**World Civilizations** 584410 10 Year  
This course is **required for graduation**. This course focuses on the interaction between our physical and cultural environments. We will study demographics, cultures, political systems, and economics throughout the course of the year.
Honors World Civilization 584500 10 Year
This full year program utilizes acceleration and enrichment of the world studies curriculum to prepare students for advanced placement courses and college work. The course is designed for students who are self-motivated learners and want a strong academic program that involves the use of critical, analytical and creative thinking skills. This class involves more work and study than a regular history class. Students should have successfully completed a gifted and talented program or demonstrated superior performance in regular social studies and English classes.

World Studies AP 584600 10 Year
This class is an optional replacement to the required World Civilizations course. This program is an accelerated class specifically designed to prepare students for advanced placement courses and college work. The course is designed for self-motivated learners who want a strong academic program with more work and study that the regular World Studies program. This course will emphasize essay writing and analytical interpretation of documents and events. Course materials will be drawn from ancient civilization, non-Western history, development of the modern world, and from the international, economic, political and social issues of the twentieth century.

U.S. History II 584800 11 Year
This course is required for graduation. This class includes the study of United States history from the 1870’s (Industrial Revolution) to the present.

U.S. History Honors 584950 11 Year
This class is an optional replacement to the required US History II course. This class includes the study of United States history from the 1870’s (Industrial Revolution) to the present. Students taking this honors class should have a current GPA of 3.0 or higher and be willing and able to work at a higher level of learning and ability to do class projects outside of class time. Students will participate in class discussions, write historical essays and complete historical research. Students will have the opportunity to participate in National History Fair.

U.S. History AP 584970 11 Year
This class is an optional replacement to the required US History II course. Advanced Placement American and European History are college level programs that require strong academic preparation and parental approval. The course is designed to help students read historical material analytically, weigh evidence and interpretations, and arrive at conclusions based on facts. Students have the opportunity to take an advanced placement examination and to receive up to ten semester hours of credit from many colleges and universities.

American Government & Citizenship 585201 12 Semester
This class is required for graduation. The goal of this class is to foster informed, responsible participation in the public life. Knowing how to be a good citizen is essential to the preservation and improvement of the United States democracy. Upon completion of this course the student will understand the major ideas, protections, privileges, structures, and economic systems that affect the life of a citizen in the United States political system. This course is for seniors only.

Social Studies Electives
American Civilization CE HIS 1700 586701 12 Semester
Students must enroll with SLCC to be in this class. This course covers American History from the Pre-Columbian period to the present. It provides a thorough examination of the major social, political, and economic events, issues, and themes of the period. This course fulfills both the American Government requirement for high school graduation and the American institutions requirement at SLCC and other state colleges. Prerequisites: 20 on the ACT or 18 on the SLCC Decision Tree Test. *Students desiring college credit must complete the admissions process for Salt Lake Community College by August 15.

Contemporary American Social Problems 586001 11, 12 Semester
Current Issues will introduce students to various issues facing the world today. Students will explore current political events, human rights, world health, environmental issues, and the role of the United States and the United Nations in a changing world. We will get involved in the political discussion by participating in events like Model UN, Mock Trial, writing Letters to the Editor and finding our voice in the current political sphere. Students will evaluate the issues and propose solutions from a variety of perspectives.

US Government and Politics CE POLS 1100 586711 12 Semester
This course surveys the institutions and practices of the U.S. national government with emphasis placed on political behavior and social conflict. Course may be taught with a service learning component.

A.P. Art History 501650 11, 12 Year
Art History AP is designed to prepare students to take and pass the AP Art History exam. It develops a student’s ability to examine works of art intelligently, acquainting them with the major forms of artistic expression from ancient to modern. Be Advised: This counts for Fine Arts or general elective credit only.
Psychology 585401 10, 11, 12 Semester
This course introduces the student to the study of behavior in individuals. It emphasizes the manner in which the individual can apply various psychological theories and concepts to better understand one's self, one's motives and one's relationships with other people. Why do we do what we do, think what we think or act the way we do? Psychology will answer these important questions about ourselves and others. You will gain a working knowledge of the theories and important terms in psychology. This course examines the history and perspectives in psychology, research methods, human psychological and biological development (neuroscience/brain), altered states of consciousness, social psychology, psychological disorders/abnormal behavior and personality. Psychology is a very hands on class that is extremely interesting and fun! All students are welcome in this course. Fee: $15.00

Sports Psychology 585491 10, 11, 12 Semester
Athletics is at least 90% mental, probably more. This course explores the mental and psychological factors that affect athletics and performance. You will explore the field of Sport Psychology and will learn techniques you can directly apply to your own performance situations and to prepare to achieve excellence in your sport and performance. This class is for students who want to strengthen their leadership skills, confidence and performance in athletics, choir, band, debate, drama, dance, cheer, student body officers, student life, work, college, future careers and life. All students are welcome in this course. Get your head in the game! Fee: $15.00

A.P. Psychology 585460 11,12 Year
The A.P. Psychology course is designed to help students successfully complete the A.P. Psychology Exam. Students will develop a working knowledge of theories, personalities, and important terms in psychology. Various areas of philosophy will be examined including: history, research methods and perspectives in psychology, human psychological and biological development (neuroscience/brain), sensation and perception, states of consciousness, learning, memory, thinking, language and intelligence, development, motivation, emotion, personality, psychological disorders/abnormal behavior, therapy, stress and health, and social psychology. A.P. Psychology is a very interactive class that is extremely interesting, applicable to life and fun! Fee: $35.00

US Government and Politics CE POLS 1100 585460 11,12 Year
This course surveys the institutions and practices of the US national government with emphasis placed on political behavior and social conflict. This course fulfills the same requirement of US Gov and provides college credit.

Practical Law 585601 12 Semester
Law and the Courts is a course directed at the study of the law and legal system. The course is geared toward providing students with a basic understanding of the underlying purposes for law, the legal system, and the function of the criminal justice system. The overall objective of the class is to give students an operating knowledge of the law and legal system in a practical manner to serve them later on in life. As a survey of all aspects of law, the course will provide students with a working knowledge of not only criminal law but family, consumer, civil, and tort law.

Peer Leadership and Relationships 610781 11,12 Semester
This class is about how to build and improve relationships and become a good leader. Concepts include seeing others as people, how to develop a growth mindset, motivation, team building, finding balance, conflict resolution, and effective communication.

AP American Government 585300 11, 12 Year
This Advanced Placement course in American Government and Politics is designed to give students a critical perspective on politics and government in the United States. The course involves both the study of general concepts used to interpret American politics and the analysis of specific case studies. Students will learn about how the United States functions on a local, national, and international scale. Students will also study various institutions, groups, beliefs and ideas fundamental to understanding the functioning of the American political system. The course will include an in-depth study of the United States Constitution as well as important Supreme Court cases. Students may earn college credit at the end of the year with the successful passing of the A.P. test. This class will satisfy the Government and Civics requirement for graduation.

Sociology 586201 11, 12 Semester
This course offers a fascinating look at human society and America's many social problems. Sociology is about people; how they act, react, and interact both in their everyday lives and under extraordinary circumstances. The content is designed to help students understand society, one's role in society, social change and the influence of society upon the individual. Students will also explore local, national and international current events utilizing a wide range of media including newspapers, magazines and television and the internet to gain the tools necessary for informed analysis of today's world. Sociology is about life itself.
**Latin American Studies**  
586081  11, 12  Semester
To explore Latin America, the richly diverse and fascinating areas of the world that includes Mesoamerica, South America and the Caribbean, from a cultural perspective focusing on food, gender, race, and class to understand the experiences and processes that have shaped the region. Students will reflect on identity, revolutions, nation-state formation, modernization and social mobilization based on analysis of primary sources such as cinema, music, literature, art and historical documents along with secondary sources. Interdisciplinary study of Latin America offers a unique insight into the lives and thoughts of Latin American peoples.

**American West**  
586021  11, 12  Semester
This is an elective class that will study American History from an American West point of view. It will start with the Louisiana Purchase and mountain men, continue with westward movement and the growth of western towns and cities and the impact the west had from 1800-1900 on America characters. This is a class for students looking to study American history in depth. Students will listen to lectures and participate in a variety of projects.

---

**SPECIAL EDUCATION**

Special Education services are provided for senior high students who are determined to have a disability in compliance with the Individuals with Disabilities Act. Special Education services are determined by the student’s individualized education program including the transition plan and will be provided in the least restrictive environment with a focus on progress in the general curriculum and outcomes after graduation.  
See your current Resource Teacher for enrollment options.

---

**WORLD LANGUAGES**

2 years of a World Language are required for the Regent’s Scholarship. Additionally, many colleges and universities require students to take 2 years of a World Language as an entrance requirement.

**Japanese 1**  
561000  9,10,11,12  Year
Basic Japanese is easier to speak than most people think it if you are passionate about it. This course will show you why. This course emphasizes the four language skills of basic listening, speaking, reading and writing skills (including hiragana, introduction to katakana and at least 30 kanji). Students will learn how to introduce themselves and get to know others, discuss and describe information about their family, daily activities, likes/dislikes, and give basic descriptions of others. Students will also learn to ask and answer questions and respond to requests. Students will also compare Japanese and American cultures.

**Japanese 2**  
561050  10, 11, 12  Year
This course builds on the skills you acquired in Japanese 1. Students will study more kanji and connect them with the vocabulary and kanji you learned in Japanese 1. Students will also learn how to write the katakana syllabary. Students will also learn how to combine sentences into more complex expressions—all while reviewing and practicing the skills they developed in Japanese 1. **Prerequisite: Japanese 1 with a passing grade of C or higher.**

**Japanese 3**  
561100  10, 11, 12  Year
This course is the next step from Japanese 2. Students will learn more subtle phrase patterns, more kanji, and more about Japan itself. Students will also move forward from formal forms to more casual, conversational ones. **Prerequisite: Japanese 2 with a passing grade of C or higher.**

**Japanese 4**  
561150  10, 11, 12  Year
This course is the next step from Japanese 3. Students will learn more complex phrase patterns, more kanji, and more about Japan itself. Students will also build on their previous Japanese to give more detail and more refined communication as they improve their speaking, listening, reading and writing skills in Japanese. **Prerequisite: Japanese 3 with a passing grade of C or higher.**

**French 1**  
560100  9, 10, 11, 12  Year
This course emphasizes the four language skills of listening, speaking, reading, and writing. Students will learn to express basic needs, greetings, likes and dislikes and to ask and answer questions, respond to directions and requests, and to exchange personal information and ideas. Students will also compare French and American cultures. **This course is not for native speakers.**

**French 2**  
560150  9, 10, 11, 12  Year
This course continues the development of speaking, listening, reading, and writing skills. Students will learn to respond to target language information encountered in daily life, narrate events, explain a process, produce formal and informal written communication, analyze cultural differences, and explore French visual arts, literature, music, drama, history, and geography. **Prerequisite: French 1 with a passing grade of C or higher. This course is not for native speakers.**

<tr>
<td>This course is designed specifically for students that have been in the dual immersion program. It continues the development of speaking, listening, reading and writing skills through advanced writing and speaking tasks and the use of authentic reading and listening texts. Narratives and dialogues are used to teach structure and vocabulary. Culture and history of Spanish-speaking countries are taught through authentic reading selections. The end-of-year proficiency targets are Intermediate High (Reading, Writing and Speaking) and Advanced Low (Listening). Students have the option to take the AP Spanish Language and Culture Exam and the end of the year. <strong>For Dual Language Immersion (DLI) students only. Prerequisite:</strong> Spanish 4 DLI (561810)</td>

<tr>
<td>The AP Course in Spanish is designed to parallel the skill development of a third-year college Spanish course in advanced composition and conversation. The course therefore focuses on the mastery of listening, speaking, reading, and writing skills. Students who enroll should already have a reasonable proficiency in reading, writing, listening and speaking. At the completion of the course the student is expected to be able to take and pass the AP Spanish Language exam/or challenge the college departmental placement exam for credit. Hispanohablantes bienvenidos.</td>

Other Electives

Driver Education

608301—First Semester
608302—Second Semester

Students whose 16th birthday is on or before February 22, 2020 are eligible for the First Semester class. Students whose 16th birthday is on or before July 18, 2020 are eligible for Second Semester class. Summer Driver Education is available for those students who will be 16 on or before October 30, 2020. Any student enrolling in driver’s education at Granger High School must have passed 9th grade English, Secondary I, Science, and World Geography to enroll. Students need to get their learners permit before each semester starts. A $140.00 fee must be paid by the second week of the course or students will be transferred from the class.

Latinos in Action

691220 9, 10, 11, 12 Year

Latinos in Action is a classroom organized around service, professionalism, and leadership and learning to be the best person you can be. Students focus on college visits, scholarship applications, learning more about their heritage, tutoring elementary students, becoming well rounded leaders, and job applications. Acting as role models, the students will journey to neighboring elementary schools twice a week during class time in order to work in the elementary classrooms. Participation in service, assemblies, dances, fieldtrips, and/or leadership positions is expected. A majority of the classwork is completed outside of class time. Attendance at activities before and/or after school is required. Students must be self-motivated to be successful in this program. LIA prepares students for college and for the future. Students must maintain a 2.5 GPA, must take at least one of the following classes during the year: Career Pathway/CTE class leading to certification, Honors, AP, or Concurrent Enrollment. Students must also represent LIA in and outside the classroom and be involved in one club or extra-curricular activity other than LIA. Fee: $15 Instructor: Braydon Eden

Lancer Action Team

586350 10, 11, 12 Year

This full-year class is a service learning course designed for those students who want to gain community service and leadership experience. During this course you will take part in the planning and execution of service projects throughout our community. Being part of LAT is a privilege and is reserved for those students who have demonstrated high standards of leadership, academic success, integrity, responsibility, and citizenship. This class is by application only. Students must have and maintain a 3.0 GPA/CPA minimum. Instructor: Ms. Neibaur

People of the Pacific

691230 9, 10, 11, 12 Year

This class is especially for students who are of Pacific Islander descent or who are very interested in learning about Pacific Islander culture. Students will learn of their identity and its integration and contribution to the American society as a whole. Students will prepare for scholarships, college admissions and athletic NCAA eligibility. Students must have a 2.5 GPA. They will participate heavily in leadership, school assemblies, and service opportunities. This class requires the student to fill out an application and be accepted. Fee: $10

Peer Tutoring – Special Education

692003 11, 12 Semester

Peer tutor training provides an opportunity for students to be in Special Education classes. Students provide tutoring and service. They will provide direction to students in navigating the high school setting and act as a peer mentor. This class may be referenced on college applications and provides an alternative to home release.

Peer Tutoring – Freshman Success

692004 11, 12 Semester

Students will work with teachers to assist in delivery of Freshman Success curriculum and provide peer support for freshmen students. They will provide direction to students in navigating the high school setting and act as a peer mentor. Duties may include: assist in teaching lessons, participate in panel discussions, conduct follow-ups, check ins, and tutor specific content areas. Peer mentors will receive training annually.

AVID (Advancement Via Individual Determination)

AVID is a college-readiness support system that prepares students in the academic middle for four-year college eligibility and success by placing them in rigorous classes with support from tutorials during the AVID elective class. AVID is not a remedial program or a study hall. Students must apply and have a personal interview.

AVID 3

571040 9 Year

AVID 3 is the elective course for sophomore students who have been in AVID in Junior High School or students new to AVID. This course includes a review of organizational and study skills with increased emphasis on college readiness skills that enrich critical thinking and writing. College exploration, planning and entrance test preparation, service, leadership and tutorial experiences are included. Expectations are that students and parents will remain in AVID all four years of high school. Students are required to take the PLAN test (Preparatory college entrance test) for sophomores. Prerequisite: Application and commitment to take Honors or AP classes and stay in AVID is required for acceptance into the program. Fee $5.00 per semester.
AVID 4 571060 10 Year
AVID 4 is the elective course for sophomore students who have been in AVID in Junior High School or students new to AVID. This course includes a review of organizational and study skills with increased emphasis on college readiness skills that enrich critical thinking and writing. College exploration, planning and entrance test preparation, service, leadership and tutorial experiences are included. Expectations are that students and parents will remain in AVID all three years of high school. Students are required to take the PLAN test (Preparatory college entrance test) for sophomores. The Mentor 2.0 class provides a screened mentor who will support the student and their education. Prerequisite: Application and commitment to take Honors or AP classes and stay in AVID is required for acceptance into the program. Fee $5.00 per semester.

AVID 5 571080 11 Year
AVID 5 is the elective course for juniors who have previously been in AVID. It includes career and college research, building a résumé of service and leadership experiences, tutorials, preparing for college entrance tests, and understanding the financial support available. It continues to emphasize college readiness skills. Preparation for the ACT and SAT test is emphasized. Students are required to take the ACT test as juniors. Requirements and expectations are that students and parents will remain in AVID their remaining years of high school. Prerequisite: Commitment to take Honors and AP classes and stay in AVID is required for acceptance into the program. Fee $5.00 per semester.

AVID 6 571110 12 Year
AVID 6 is the elective course for seniors who have previously been in AVID. It refines and builds critical thinking, reading and writing skills needed for college success. A major focus for the AVID senior year is completing college applications, finding and applying for scholarships and financial aid for college. Students in this course can option to earn AVID Honors at Graduation through completion of the Senior Portfolio. Requirements and expectations are that students and parents will remain in AVID the full senior year. Prerequisite: To enroll in Senior AVID you must have previously completed 1 year or more of AVID in high school. You must also complete an Application and commit to taking Honors and AP classes and stay in AVID is required for acceptance into the program. Fee $5.00 per semester.

Release Time
008001—1st Semester 008002—2nd Semester 9, 10, 11, 12
Students registering for Release Time, do so to enroll in L.D.S. Seminary or other denominational equivalents.

GRANITE CONNECT – Online School: My Pace, Anytime, Anyplace
This is Granite’s new online school. Although most of the courses are typical 11th grade courses, any student in grades 10-12 may register for the courses. To enroll in online classes obtain a permission / disclosure slip from your counselor, complete and send it to: Patrick Colclough, Online Credit Coordinator. Please don’t hesitate to contact us with questions or concerns please contact Patrick Colclough (385-646-4613) through the Curriculum and Instruction Department.

</table>
CTE pathways are a sequence of two or more CTE courses within a student’s area of career interest. Pathways are designed to connect high school classes to college, industry certifications, and/or a career. While in high school, students have the opportunity to acquire free technical skills training in the career field in which he/she is interested. Students will learn valuable technical skills and soft skills making them employable regardless of their final field of study.

Welcome to the... GRANITE TECHNICAL INSTITUTE
The Department of Career and Technical Education in Granite School District has a well-earned reputation for providing high-quality programs that are targeted at high-demand industries. To further this focus, the Granite Technical Institute offers courses in Health Science, Technology & Engineering, Information Technology, Biotechnology, Culinary Arts, Aviation, Agriculture and Home Building/Construction. The GTI offers classes in 2 period blocks only due to traveling time. Semester classes reward 1.00 credit and Year classes reward 2.00 credits.

The mission of the Granite Technical Institute is to support students in finding personal purpose, potential and a pathway to their future. This is accomplished by helping students achieve in their program and move seamlessly into further training and employment. Effort is made to directly align critical academic subjects with career and technical education courses, thus promoting real-world application of academic theory in such areas as mathematics, science and English. In addition, articulation and collaboration with Salt Lake Community College and other post-secondary institutions makes the transition to post high school education easier for students. Clear pathways of training have been designed to support student growth from the 9th through the 12th grades. Courses being offered during the 2018-2019 school year are included in the pages that follow.

CE ** Concurrent Enrollment College Course - Many of the courses offered here at the GTI are concurrent college courses; 11th and 12th grade students can receive high school and college credit for successfully completing the course. It is the student’s responsibility to apply to Salt Lake Community College ($40), Weber State ($35), Utah Valley University ($30), Utah State University ($50) (fees are non-refundable) by August 20th. Students must also pay (to the college) a $5.00 fee per credit hour (non-refundable).

Busing will be provided for students twice daily from the student's home high school to the GTI. All courses listed in this catalog will be taught at the Granite Technical Institute (2500 South State Street) unless otherwise specified. This schedule is designed to accommodate two-period block enrollments. Students interested in registering for these courses should see the Career Center Coordinator at their high school. Questions regarding the Granite Technical Institute can be directed to Devon Hartley at 385-646-4350, email: djhartley@graniteschools.org or Julie Bagley, GTI Counselor at 385-646-4629, email: jjbagley@graniteschools.org

HOW TO REGISTER
In order to register for any of the classes offered through the Granite Technical Institute, pick up an application in the Career Center of their high school. Once the application is complete and signed by both the student and their guardian return to the Career Center for review and approval by the Career Center Coordinator. The Career Center Coordinator will then help the student determine whether additional information is required and will help facilitate the scheduling process.

12/5/2018
ACADEMIES OF BUSINESS

The most popular bachelor’s degree in the United States is in Business (22% of all bachelor’s degrees). The Academy of Finance is new this year to the G.T.I. The Academies are affiliated with SLCC to allow students to earn concurrent college credit. Students will enroll in two courses each semester. If students graduate from the Academies, they fulfill at least 1 Utah State Pathway. This program requires all students to be concurrently enrolled through Salt Lake Community College.

Did you know the Hospitality & Tourism is Utah’s #2 industry, bringing in over $6 billion in revenue to Utah’s economy. The United States Bureau of Labor Statistics estimates that 1.3 million jobs will be added by the year 2020.

ACADEMY OF HOSPITALITY & TOURISM

Year (2 period block) 11-12 grade  $25 fee per course required per semester

The Academy of Hospitality & Tourism is a two-year program for sophomores, juniors and seniors with career interests in the business of hospitality and tourism. The comprehensive curriculum includes business management, marketing, accounting, hospitality services, travel and tourism, desktop publishing, customer service, and business communication. Students take four semester classes each year for a two-year period. Familiarization tours & job shadows are taken to expose the students to possible careers in the industry. Possible familiarization tours include: Arches National Park, Goblin Valley State Park, Zion National Park, Dead Horse Point, Canyonlands National Park, Bryce Canyon National Park, The Grand America Hotel, Marriott, Intercontinental Hotels Group & many others. Students can earn up to 9 college credits in this two-year program. Enrollment is open to any Granite School District student able to excel in college level coursework. Additional Fees may be incurred for optional field trips offered to students. Concurrent Enrollment through SLCC and Weber State. Students must apply for admission to both colleges.

**Fall 2019 Semester Courses:**
Business Communications I*
Lodging & Recreation

**Spring 2020 Semester Courses:**
Management 1600: Management Essentials CE

ACADEMY OF EDUCATION

ORIENTATION TO EDUCATION CE **
 Semester 11-12 grade
(Taken with Teaching as a Profession 3 = 2 period block)
$20 Course fee required per semester
Teaching as a career - challenges and rewards, history, philosophies, social issues, legal issues, job availability, and governance. Preparation for acceptance into a teacher education program. Field experience required. All students will have time in an elementary classroom as part of this class. This course offers concurrent enrollment through SLCC EDU1010 3.0 credit hours. Student is responsible to register and pay for concurrent enrollment classes at SLCC.

LIFESPAN HUMAN DEVELOPMENT CE **
 Semester 11-12 grade
$20 Course fee required per semester
Fundamentals of growth and development from preconception to old age and death are explored. The domains of physical, cognitive, and social-emotional growth for each age in the life cycle are explored in a variety of contexts. This course offers concurrent enrollment through SLCC FHS 1500, 3.0 credit hours. Student is responsible to register and pay for concurrent enrollment classes at SLCC.

AGRICULTURAL SCIENCE
Agriculture is the nation’s largest employer, with more than 21 million people working in some phase of industry from growing food and fiber to selling it in the supermarkets. The mission of Agricultural Science and Technology Education is to prepare students for employment and/or continuing education opportunities in the field of agriculture. This is accomplished through technical instruction in the classroom, experiential education in the laboratory, the Supervised Agricultural Experience Program, and through leadership and personal development in FFA (Future Farmers of America-student organization).

ANIMAL SCIENCE I
 Semester (2 period block) 9-12 grade
$30 course fee required per semester
Animal Science will provide students with the opportunity to explore the many aspects of the livestock industry. During this course, students will study breeds of dairy cattle, beef cattle, equine, sheep, swine, and poultry. Students will look at animal breeding and reproduction, housing facilities, proper management practices, and feeding and nutrition. Judging and showing of some of these livestock breeds will also be included. FFA involvement is recommended for all students enrolled in this course. This course may also be taken to fulfill a third science credit requirement.

ANIMAL SCIENCE II
 Semester (2 period block) 11-12 grade
Prerequisite: Animal Science 1 or Equine Science
$30 course fee required per semester
Students will develop knowledge and skills in a wide range of animal agriculture principles, including anatomy and physiology, health maintenance, waste disposal and facilities. The efficient production and effective management of selected animal enterprises are covered, including beef and dairy cattle, swine, sheep, goats, poultry and equine. Practices in veterinary medicine and those associated with small animal care are included. FFA involvement is recommended for all students enrolled in this course.

FLORICULTURE AND GREENHOUSE MANAGEMENT
 Semester (2 period block) 9 - 12 grade
$30 Course fee required per semester
This intensive course in greenhouse operation and management prepares students to produce commercial plant species in a controlled environment and to manage commercial and experimental greenhouse operations. Studies will also include: basic plant biological systems, soil science, plant propagation, and floral design.

EQUINE SCIENCE 1 & 2
 Semester (2 period block) 9-12 grades
$30 Course fee required per semester
This course prepares students to care for horses and horse equipment; to train horses for various work and athletic or entertainment roles; and to manage horse training, breeding, and housing programs and facilities. This course may also be taken to fulfill a third science credit requirement.
INTRO TO HORTICULTURE
Semester (2 period block) 11-12 grades CE ** (PURE)
This course is an introduction to the production of nursery, greenhouse, fruit, and vegetable crops. Residential and commercial landscape construction and management will be explored, and students will learn about interior plants, arboriculture, turf science, landscape plant materials, and home gardening. This class is one of the first requirements for the USU Horticulture Major and fulfills a Breadth Life Science requirement at USU. Utah State concurrent enrollment credit PSC 1800-3 credits).

LANDSCAPE MANAGEMENT/ NURSERY OPERATION
Semester (2 period block) 9-12 grade $30 Course fee required per semester
Students will develop knowledge and skills in nursery operation and landscape management practices that will prepare the students to select appropriate plant materials and to design, install, and maintain interior and exterior plantings and hardscapes. They will also learn to maintain the facilities and equipment associated with this industry.

NATURAL RESOURCE SCIENCE I
Semester (2 period block) 9-12 grade $10 Course fee required per semester
This introductory course is designed to give students knowledge and skills related to production, management, and conservation of natural resources. Students explore such topics as ecology, range resources, waste management, and land use. Students will also be introduced to various careers in Natural Resource Science such as fish and game officer, water technician, and park manager. Hands-on field experience is emphasized at weekly trips to Wheeler Farm and other sites. This course may also be taken to fulfill a third Science credit requirement.

NATURAL RESOURCE SCIENCE II
Semester (2 period block) 10-12 grade $10 Course fee required per semester
Prerequisite: Natural Resource Science I
This course builds upon knowledge and skills gained in Natural Resource Science I. In addition, it covers such topics as the biological, environmental, and economical importance of renewable natural resources, and forest and range products. Students will also be introduced to various careers in Natural Resource Science such as fish hatchery manager, wildlife officer, hunting outfitter/guide. Hands-on field experience is emphasized at weekly trips to Wheeler Farm and other sites. This course may also be taken to fulfill a third Science credit requirement.

VETERINARY ASSISTANT 1
Semester (2 period block) 10-12 grade $30 Course fee required per semester
Prerequisite (one of the following): Animal Science I or Equine Science
This course is designed to encourage students to pursue a career in large animal veterinary practice. The program will focus on the following areas of study: safety and sanitation in veterinary science, veterinary terminology, anatomy and physiology, clinical examinations, hospital procedures, parasitology, Course oratory techniques, animal nutrition, principles of disease, animals in society, career exploration, and animal management. Students enrolled in this program will also have leadership opportunities through the FFA, a component that will be integrated into the vet assistant course. This course provides entry-level skills for those students who want to enter an occupation right out of high school and provides the background necessary for students interested in pursuing a professional degree. Course oratory activities provide students with the hands-on experience and skills needed to participate in the exciting field of veterinary medicine. This course may also be taken to fulfill a third science credit requirement.

AVIATION PROFESSIONAL PILOT PROGRAM
In cooperation with Utah Valley University, high school students may enroll in the aviation courses listed below and receive concurrent enrollment credit from UVU. Exceptions to this format must be arranged through the G.T.I. administration.

PRIVATE PILOT GROUND SCHOOL CE **
Semester (2 period block) 11-12 grade (must be 17 by the end of the semester) $40 Course fee required per semester
This course focuses on the study of aviation fundamentals, principals of flight, aircraft and engine operations, weather, navigation, and radio communications as required by FAA regulations. Students will be prepared to begin flight training. This course must be taken for UVU concurrent enrollment credit AVSC 1100, 4.0 credits.
PRIVATE FIXED WING SIMULATOR LAB
(Taught in conjunction with Private Pilot Ground School)
Practical application in a simulation lab to include the information for private pilot flight maneuvers, procedures, and regulations for takeoff, cruise, traffic pattern operations, approach, emergencies, and cross-country operations. Time in the Simulator is based on size of the class. Taken concurrently with Private Pilot Ground School.

SURVEY OF AVIATION SCIENCE CE **
 Semester (2 period block) 10-12 grade  
$20  Course fee required per semester
Designed for all students interested in aviation careers. Includes a general knowledge of aviation, historical events, and aerospace studies/development opportunities. Studies aviation and aerospace terminology, how aircraft and spacecraft fly, research and development of future systems, government and industry roles in the growth of aviation, and potential careers in aviation. This course must be taken for UVU concurrent enrollment credit AVSC 1010, 2.0 credits.

PRIVATE PILOT GROUND SCHOOL CE **
 Semester (2 period block) 11-12 grade (must be 17 by the end of the semester)  
$40  Course fee required per semester
This course focuses on the study of aviation fundamentals, principals of flight, aircraft and engine operations, weather, navigation, and radio communications as required by FAA regulations. Students will be prepared to begin flight training. This course must be taken for UVU concurrent enrollment credit AVSC 1100, 4.0 credits.

PRIVATE FIXED WING SIMULATOR LAB
(Taught in conjunction with Private Pilot Ground School)
Practical application in a simulation lab to include the information for private pilot flight maneuvers, procedures, and regulations for takeoff, cruise, traffic pattern operations, approach, emergencies, and cross-country operations. Time in the Simulator is based on size of the class. Taken concurrently with Private Pilot Ground School.

AIR TRANSPORTATION MANAGEMENT CE **
 Semester (2 period block) 11–12 grade  
$20  Course fee required per semester
Presents the managements skills necessary to be a fixed based operator and entry-level manager for scheduled airlines in the national aviation system. Teaches management functions, marketing, financing, organization and administration, flight operations, maintenance, safety and liability. Provides hands-on experience of management styles through evaluations and critiques of local airlines and airport facilities. Includes a student’s simulated model of an FBO and related management operations as a final project. This course must be taken for UVU concurrent enrollment credit AVSC 2150, 3.0 credits, for qualified 11th and 12th grade students.

BIOTECHNOLOGY/BIOMANUFACTURING

BIOTECH RESEARCH CE ** (PURE)
Year (2 period block) 11–12 grades  
$20  Course fee required per semester
This hands-on introductory course provides opportunity for students to explore the exciting emerging world of biotechnology. It provides a solid foundation for students who wish to pursue careers in fields such as bioengineering, biotechnology, and biological science among others. Developing marketable, hands-on lab skills is the course’s primary objective. This objective is met as students work at the lab bench on such topics as DNA structure, gene expression, protein synthesis, recombinant DNA strategies, DNA testing, DNA sequencing, forensics, and bioethics. This course must be taken for SLCC concurrent enrollment credit BTEC1010, 3.0 credits, & BTEC 1015, 1.0 credit for qualified 11th and 12th grade students. This course may be taken to fulfill a third science credit requirement.

BIOMANUFACTURING 1
 Semester (2 period block) 10–12 grades  
$20  Course fee required per semester
Learn how to improve and save lives. Utah’s medical device life sciences industry is growing. This course offers hands-on projects designing and building prosthetic heart valves, delivery catheters, prosthetic arm and infusion devices using 3D computer design, plastic injection molding and 3D printing. Field trips to Utah’s most elite medical device manufacturing and laboratory testing companies. Understand why FDA regulations and quality systems are important to the medical device industry. Learn benefits of applying Lean-Six sigma and continuous improvement in manufacturing. This course is required for the Medical Innovations Pathways (MIP) program and the MIP Certificate guarantying interviews with industry partner companies. This course may be taken for CTE credit or to fulfill a third science credit requirement.
CONSTRUCTION TRADES

This is a comprehensive construction experience where students, under the supervision of experienced, licensed contractors, help construct an entire house while participating in all phases of home construction or participate in a variety of commercial construction projects. Students may specialize in residential carpentry, commercial carpentry, electrical, or plumbing, with the ability to participate in all of these trades. This is an excellent experience for those interested in construction related careers, including construction management, or for those who want building and remodeling experience. Apprenticeship programs are available. Transportation is provided to the construction site.

ELECTRICAL TRADES CE **
Year (2 period block) 10–12 grades
This is a comprehensive electrical experience where students are under the supervision of an experienced and licensed electrical contractor. Students will be engaged in the wiring of a home, which includes: the rough and finish wiring, electrical service, and all phone and data. Students will also experience many commercial projects around the district where they will learn conduit bending and the differences between residential and commercial wiring. In addition to hands-on projects, students will also learn the National Electrical Code and Electrical Theory. This class provides great experience for those interested in electricity and those who may want to be part of basic electrical installations and remodeling. Apprenticeship programs are available. This course may be taken for SLCC concurrent enrollment credit ELI 1110, 5.0 credits, for qualified 11th and 12th grade students.

HOME BUILDING (RESIDENTIAL CARPENTRY) CE **
Year (2 period block) 10–12 grades
Prerequisite: 10th graders must have completed Construction Trades 1 or 2 before taking Homebuilding.
This is both an introductory and second year class that is designed to provide the student with a solid base of understanding and experience in the carpentry trade. Students will be exposed to this trade by constructing a residential home off site (bussing provided). This course will involve students with hands-on and learning activities in the building process from digging the foundation to shingling the roof. Other opportunities include: plan reading, concrete work, all phases of framing, insulation, drywall, hanging doors & windows, interior doors and trim work, exterior finishes, painting. Construction Management is addressed and the class is also offered as a Salt Lake Community Concurrent class for sophomores, juniors & seniors. This class is fun and will provide valuable training and experience that can be used in a career or for personal remodeling or construction projects. This course may be taken for SLCC concurrent enrollment credit CMGT1320, 4.0 credits and CMGT 1330, 4.0 credits, CMGT 1410, 2.0 credits for qualified 11th and 12th grade students.

PLUMBING
Year (2 period block) 10–12 grades
This is a comprehensive construction experience where students, under the supervision of an experienced licensed contractor, participate in a variety of commercial construction projects. Students may specialize in plumbing with the opportunity to participate in all trades. This is an excellent experience for those interested in construction-related careers, including construction management, or for those who want building and remodeling experience. Apprenticeship programs are available.

CONSTRUCTION TRADES FOUNDATION 1
Semester (2 period block) 9-10 grades
Construction Trades Foundation 1 is designed to introduce students to the basic skills needed for an entry-level position in the construction field. Students will be exposed to basic safety, which complies with OSHA-10 training. Students will work with construction math. They will be adding, subtracting, dividing, and multiplying whole numbers, fractions, and decimals, and explain their application to the construction trades. Students will learn about the safe use of hand and power tools used in the industry and will be familiarized with reading, interpreting, and applying construction drawings. Students will be taught about basic rigging.

CONSTRUCTION TRADES FOUNDATION 2
Semester (2 period block) 9-10 grades
Construction Trades Foundation 2 provides students with the opportunity to explore many areas of the construction industry. Licensed contractors teach this class, and students will be able to work through learning modules at their own pace and in several areas. Students will be exposed to site lay out and distance measurements; concrete and masonry; floor systems; wall, ceiling, and roof framing; and roofing applications. Students will also be introduced to drain, waste, and vent systems using plastic and copper pipe and fittings for residential construction. This is an excellent class for those who want to learn about the construction industry.
CRIMINAL JUSTICE

The Criminal Justice program is designed to prepare students for an exciting career in the field of law or law enforcement. Students will learn the basics of criminal justice, criminal law and corrections and how these subjects impact and interplay with current events. The Careers in Law Enforcement course will explore many diverse career opportunities that are available/possible including Police Officer, Swat Team member, Detective, k-9 Officer and other criminal justice related disciplines as well as careers with Federal Agencies such as FBI, Secret Service, DEA and ATF. Students will have the opportunity to meet professionals in criminal justice related fields and participate in a variety of criminal justice related activities.

INTRO TO CRIMINAL JUSTICE
Semester 11-12 grade
(Taken with Intro to Corrections = 2 period block)
This course explores theories, concepts and methods used to facilitate understanding, predicting and responding to issues of deviance and crime in America. Also includes development and evolution of components of the American Criminal Justice System, including the history of racial, ethnic and gender discrimination in charging, conviction, incarceration and employment. CTE credit or Elective credit: up to 2 credits total. This course offers SLCC concurrent enrollment credit CJ 1010, student is responsible to register and pay for concurrent enrollment classes at SLCC.

INTRO TO CORRECTIONS - CE **
Semester 11-12 grade
(Taken with Intro to Criminal Justice = 2 period block)
This course examines the history, function and administration of corrections in our criminal justice system. This course offers SLCC concurrent enrollment credit CJ 1300, 3 credits. Student is responsible to register and pay for concurrent enrollment classes at SLCC.

CRIMINAL LAW - CE **
Semester 11-12 grade
Taken with Career in Law Enforcement = 2 period block
This course examines crimes, defenses, and the historical origins and development of criminal law in our society. Topics include sources of substantive law, case law, classification of crimes, parties to crime and related topics. This course offers SLCC concurrent enrollment credit CJ 1330. Student is responsible to register and pay for concurrent enrollment classes at SLCC.

CAREER IN LAW ENFORCEMENT CE **
Semester 11-12 grade
This course provides an insight into the workings and hiring practices of various law enforcement agencies such as ATF, DEA, FBI and local, county, and state police agencies. This course offers SLCC concurrent enrollment credit CJ 2540, 3 credits. Student is responsible to register and pay for concurrent enrollment classes at SLCC.

CULINARY ARTS

It's no secret that the restaurant and food service industry is growing. In fact, it is estimated that from 2012 to 2020 the number of jobs in the restaurant and food service industry is projected to increase by 21 million, of which approximately 50,000 will be management positions.

CULINARY PROFESSIONS/PROSTART 1 CE **
Semester (2 period block) 11-12 grade
$30 Course fee required per semester
Prerequisites: Foods 1 or Foods 2
This is an advanced culinary class that is an industry-driven curriculum preparing students for a career in restaurant and food service management. Students will learn and practice hands on skills dealing with safety and sanitation, industrial kitchen equipment, seasoning and cooking techniques, food preparation and exploration, management and front of the house basics. Students also have opportunities with FCCLA, ProStart and Skills USA to compete in culinary competitions for further exploration and skills in the food service industry. This course will strengthen comprehension of concepts and standards outlined in Sciences, Technology, Engineering and Math (STEM) education. This course offers SLCC concurrent enrollment credit CHEF 1110, 3 credits.
CULINARY EXPLORATIONS/PROSTART 2
Semester (2 period block) 11-12 grade $30 Course fee required per semester
Prerequisites: Foods 1 or Foods 2
This is an advanced culinary class that is an industry-driven curriculum preparing students for a career in restaurant and food service management. Students will learn and practice hands on skills dealing with safety and sanitation, menu development and marketing, food preparation and exploration and cost control in a food service environment. Students will have the opportunity to receive a ServSafe managers certificate, Workplace Safety certificate and with completion of both ProStart 1 and ProStart 2, a National Restaurant Association Certificate. Students also have opportunities with FCCLA, ProStart and Skills USA to compete in culinary competitions for further exploration and skills in the food service industry. This course will strengthen comprehension of concepts and standards outlined in Sciences, Technology, Engineering and Math (STEM) education.

CULINARY ARTS/INTRO
Semester (2 period block) 10-12 grade $30 Course fee required per semester
Prerequisites: Foods 1 or Foods 2
Students will be trained for career opportunities in the food service/culinary arts industry. Students will have the opportunity to learn and practice safety and sanitation procedures, and to use and maintain commercial food service equipment. They will perform quantity food preparation as it relates to catering, bakery, restaurant, hospitality, and fast food business operations. This course will strengthen comprehension of concepts and standards outlined in Sciences, Technology, Engineering and Math (STEM) education. Student leadership and competitive events (FCCLA) may be integrated into this course.

FIRE SCIENCE PROGRAM
This program prepares individuals to perform the duties of a firefighter. Instruction includes training in safety, firefighting, equipment operation, maintenance, and the principles of the fire science.

INTRODUCTION TO EMERGENCY SERVICES CE **
Year 11-12 grade $40 Course fee required per semester
(Taken with Principles of Fire & Emergency Services Safety = 2 period block)
REQUIREMENT: Due to some strenuous physical activities, the student must pass a physical entrance test and must obtain a physician’s approval based on such requirements. This course introduces the various duties within emergency services, including structural firefighting, wildland fire fighting, technical rescue, hazardous materials control, fire protection, fire investigations, and incident command. Develops basic emergency skills in hazard recognition, response organization, and fire extinguisher use. This course offers concurrent through Utah Valley University, ESFF 1000 4.0 credit hours. Student is responsible to register and pay for concurrent enrollment classes at UVU.

PRINCIPLES OF FIRE & EMERGENCY SERVICES SAFETY CE **
Year 11-12 grade $40 Course fee required per semester
(Taken with Introduction to Emergency Services = 2 period block)
REQUIREMENT: Due to some strenuous physical activities, the student must pass a physical entrance test and must obtain a physician’s approval based on such requirements. Introduces the basic principles and history related to the national firefighter life safety initiatives. Focuses on the need for cultural and behavior change throughout the emergency services. This course offers concurrent through Utah Valley University ESFF 1120 3.0 credit hours. Student is responsible to register and pay for concurrent enrollment classes at UVU.

SCIENCE CONCURRENT CLASSES
BIOLOGY WITH LAB CE **
Semester 11-12 grade $40 Course fee required per semester
This course content: The study of living organisms from bacteria to plants and animals. Introduces cell structure and physiology, inheritance, evolution, and classification. Three hours of lecture per week with additional lab component (BIOL 1015) required. This course offers concurrent enrollment through SLCC BIOL 1010 & 1015, 4.0 credit hours. Student is responsible to register and pay for concurrent enrollment classes at SLCC. Must have required test scores: Accuplacer: Reading 58, ACT: Reading 16.
CHEMISTRY WITH LAB CE **
Semester 11-12 grade
Survey of general chemistry: structure, composition, properties and chemical transformations. This course offers concurrent enrollment through SLCC CHEM 1010, 3.0 credit hours. Student is responsible to register and pay for concurrent enrollment classes at SLCC.

HEALTH SCIENCE TECHNOLOGY

Our Health and Medical Programs are some of our most popular as students recognize that there is a high demand for skilled health care professionals. Students can graduate from high school as a Nursing Assistant, Medical Assistant, EMT, or Pharmacist Technician and make $9-$14 an hour and be better prepared for nursing school, medical school, pharmacy school or any other medical profession.

CERTIFIED NURSE ASSISTING
Semester (2 period block) 11-12 grade
Requirement: You must be 16 yrs. old when you begin the course. $30 Course fee required per semester
Prerequisite: Medical Terminology or Medical Anatomy
This program prepares students to perform routine nursing-related services to patients in hospitals or long-term care facilities under the training and supervision of a registered nurse or licensed practical nurse. Students learn basic nursing skills such as taking and recording vital signs and recognizing abnormal changes in body functioning. A 46-hour clinical experience is required in a nursing facility to complete course requirements. Clinical is from 3:00 – 8:00 p.m. one day per week and two Saturdays from 6:00 a.m.– 2:00 p.m. Students must supply their own uniforms; watches with sweep second hands, pens, and small notebooks. An additional .25 credit will be earned by completing clinical hours. Students must have good social skills, good attendance, and the ability to get themselves to their clinical experiences. Some college and university nursing programs require a CNA for admission to their program. Students must provide a social security or IRS number in order to take the state C.N.A. exam. State certification exam is $75.

DENTAL ASSISTING I
Semester (2 period block) 12 grade
$40 Course fee required per semester
Dental Assisting I: Introduces students to the field of dental assisting. Students will learn basic patient care skills in preparation to assist a dentist or dental hygienist in functions of a dental practice. Skills include: infection control procedures, patient preparation, examination, preventive care, dental materials, and restorative and specialty procedures.

DENTAL ASSISTING II
Semester (2 period block) 12 grade
Prerequisite: Completion of Dental Assisting $40 Course fee required per semester
Dental Assisting II: Students will complete their training with dental imaging, laboratory skills: bleaching trays, custom trays, sports guards, front office training in the Dentimax system and expanded function skills. Students will learn job-seeking skills to aid in obtaining a 90-hour externship for fourth term. Dental Assisting I and II is NOT accredited through the Dental Assisting National Board (DANB). Radiography Certification is offered through the Utah Dental Association for an additional $30.00. CPR training is offered at the GTI for an additional $30.00.

EMR (Emergency Medical Responder) CE **
Semester 9-12 grades
$40 Course fee required per semester
(Taken with Intro to Health Science & Technology = 2 period block)
This semester course provides students with advanced emergency medical information and skills. The course introduces students to a variety of career options in emergency medicine along with preparing students to take nationally recognized tests and certification in Advanced First Aid, CPR and Emergency Medical Response. Students will learn basic skills prior to enrolling in EMT, nursing assisting, medical assisting and dental assisting courses. This course offers Weber State University concurrent enrollment credit AT 2300, 3.0 credit hours.

EMT (Emergency Medical Technician) CE **
Year (2 period block) 12-grade
$40 Course Fee Required per Semester
This program prepares students to perform initial medical assessment, treatment, and comprehensive care in medical crises, under the general supervision of a coordinating physician. Instruction includes all aspects of basic health care, disease and disorder recognition, injury diagnosis, and emergency treatment procedures for various injuries and disease outbreaks. Students learn theory and then participate in extensive skill practice sessions with EMTs. Students will be registered with the Utah Bureau of Emergency Medical Services to become a Certified EMT. Students must have a social
security number for state certification, which costs $127.00. Students will take the National Registry of EMT exam at the end of the course, which will cost $70 payable prior to testing. Course items for certification include: workbook - $30, stethoscope and blood pressure cuff - $50, and bandaging supplies - $20, CPR Certification - $30, National Testing Fee - $25, Class Uniform- $30. This course offers Weber State University concurrent enrollment credit PAR 1000 & PAR 1001, 6.0 credit hours. **Students must provide a social security number in order to take the state Emergency Medical Technician exam.**

**EXERCISE SCIENCE/SPORTS MEDICINE CE **

*Semester (2 period block) 11-12 grade*

$35 **Course fee required per semester**

Prerequisite: Medical Terminology or EMR/ Intro to Health Science. Medical Anatomy & Physiology recommended.

This course is designed to teach students components of Exercise Science and Sports Medicine by exploring topics such as anatomy/physiology, medical terminology, injury evaluation, nutrition, rehabilitation, and sports psychology. The course also includes many taping procedure labs and other hands-on activities. Extracurricular opportunities such as Future Doctors and job shadowing externships, allow students to further investigate areas of medicine. This course offers concurrent enrollment through Utah Valley University, Pes 2400, 2.0 credit hours.

**INTRO TO HEALTH SCIENCE & TECHNOLOGY**

*Semester 9-12 grades (Taken with EMR = 2 period block)*

This semester course is designed to create an awareness of career possibilities in health care and inform students of the educational options available for health science and health technology programs. Instruction includes beginning anatomy and physiology, medical terminology, medical ethics, diseases and disorders.

**MEDICAL ASSISTING**

*Year (2 period block) 12-grade*

$40 **Course fee required per semester**

Prerequisite: Medical Terminology; Instructor strongly recommends Medical Anatomy & Physiology

When all requirements are met, this program prepares students to assist practitioners in the front office and clinical setting of a medical office. The rigorous curriculum covers: administrative areas such as bookkeeping, insurance matters, and general office management; and clinical duties such as assisting with physical exams, screenings, treatments and completing duties in the medical office laboratory. A 160-hour externship is required for completion of certificate. Students must have good social skills, excellent attendance, a desire to serve their community, and the willingness to learn. An application is required for this program, and lists specific expectations.

**MEDICAL ANATOMY & PHYSIOLOGY CE **

*Year (2 period block) 11-12 grades*

$15 **Course fee required per semester**

Create models of human systems. Explore through dissections and hands-on activities. Investigate how the human body changes with diseases and disorders. This course provides an exciting in-depth experience of the human body that includes medical terminology and medical ethics. Discover your future as a health care professional through job shadowing and service learning experiences. Prepare for success in a variety of health technology programs. **This course may also be taken to fulfill a third Science credit requirement.** Students are required to be concurrently enrolled through Weber State; HTHS 1120, 3 credits.

**MEDICAL FORENSICS CE ** (PURE)

*Semester (2 period block) 11-12 grades*

$30 **Course fee required per semester**

This course is designed to create an awareness of the branch of health science relating to medical forensics and working in a medical laboratory. Students will learn to identify, analyze, and process logically using deductive reasoning and problem solving. It focuses on introductory skills necessary to prepare students for the crime scene or crime lab investigation and medical lab work. **This course offers SLCC concurrent enrollment credit CJ 1350, 3 credits. This course may be taken for CTE credit or to fulfill a third science credit requirement.**
MEDICAL TERMINOLOGY CE ** (A day concurrent only)

Semester (2 period block) 9-12 grades

*Course fee required per semester*

$25

Students must be able to read at or near grade level. This class consists of lecture and video presentations. Students learn the meanings and pronunciations of prefixes, roots, and suffixes that combine to form over 11,000 medical terms. This is essential knowledge for any health career. The other Medical Terminology sections will be high school credit only. This concurrent credit is required for SLCC’s Medical Assisting, Surgical Tech, and Pharmacy Tech programs. If students are NOT planning on those programs at SLCC, there is NO NEED for them to take it for SLCC Concurrent Credit, as the class credit does not transfer to other institutions or programs. Medical Terminology is a prerequisite for Medical Assisting and Pharmacy Technician at the GTI and recommended for Certified Nurse Assisting, as well as for any ELL students who are planning on taking medical training courses. This course offers SLCC concurrent enrollment credit MA 1100, 3 credits.

PHARMACY TECHNICIAN

Year (2 period block) 12th grade

*Pre or Co-requisite: Medical Terminology*

$40

This program prepares students to support pharmacists by providing assistance during patient consultation, counter dispensing operations, and prescription preparation. Students will also be trained to keep patient and related health record information and to perform a wide range of practice-related duties for both retail and hospital-based pharmacies. Students must have good social skills, good attendance, and the ability to get themselves to their externship experiences. Students must have a social security number to qualify to take the licensure exam. The cost for exams are, National Exam PTCB $129 or ExCPT $105 (students need only do ONE test). State Licensure Fee $99. Students must maintain a “B” average and complete a 180-hour externship in addition to course work for successful licensure with the state of Utah. Students must provide a social security number in order to take the national exam and become licensed in the state of Utah. Trainee license is $50.00 (Paid to DOPL).

PHYSICAL THERAPY

Semester (2 period block) 11-12 grades

$30

Semester Prerequisite: Medical Terminology

This course introduces students to the field of physical therapy through the history, medical terminology, documentation, therapy treatments, and pertinent legal and ethical considerations of the profession. Healthcare for diverse population begins its thread in this course. Students will participate in clinical observations.

INFORMATION TECHNOLOGY

Information technology programs include the study, design, development, implementation, support and/or management of computer hardware, software applications, multimedia, computer-based information systems, and integration services. Information technology coursework is divided into four specialty strands. Students may choose to take a sequence of courses in one specialization strand or they may take courses across each strand to gain a broader understanding of the information technology industry.

COMPUTER PROGRAMMING 1

Semester Class (2 period block) 9-12 grade

This semester course is an introduction to computer programming using C#. Students will learn problem solving and object-oriented programming as they design code and test your own programs. Students will learn C# syntax, graphical user interface (GUI) and simple program control and data structures. Students will produce a graphical game or a business application as their final project.

COMPUTER PROGRAMMING 2/MOBILE APPS CE **

Semester (2 period block) 10-12 grade

Prerequisite: Computer Programming 1

This course is designed to learn the JAVA programming language. In addition, this course is designed to take programming concepts and implement them into mobile device technology. Emphasis will be on completing individual and team based programming projects that demonstrate a student’s ability to grasp new cell phone technology and Java. Students will build customized user interactive text messages, GPS map location, voice recorder, and mobile applications. This course offers SLCC concurrent enrollment credit CSIS 1030, 3 credits.
COMPUTER PROGRAMMING PROJECTS
Semester Class (2 period block) 11-12 grade
Prerequisite: Computer Programming 1
This is an advanced computer course for students who have completed Computer Programming 1 or Advanced Web Development. Students will develop code using C#, SQL, PHP and JAVA script. This opportunity is for students to build a WEB server, use a relational and database with SQL and program Arduino microcontroller projects. Note that this course is designed to strengthen their experience using current programming skills and to help students acquire marketable skills for all professional work forces. This course may also be taken to fulfill the 3rd math credit requirement.

INTRODUCTION WEB DEVELOPMENT
Semester Class (2 period block) 9-12 grade
This course is designed for students who desire an introduction to web development pages using HTML5, XHTML, Dynamic HTML, tables, frames, input forms and cascading style sheets. Prior web development is not a requirement for this course. Students will build their own personal websites and maintain their on-going structure and design changes.

ADVANCED WEB DEVELOPMENT
Semester Class (2 period block) 9-12 grade
Prerequisite: Introduction Web Development
This course is designed to take fundamental concepts and technologies used in web development such as PHP, SQL XML, XHTML and create more sophisticated web sites with databases. Focus will be on completing team web-based projects that incorporate multimedia, JavaScript, PHP, database and Java Applets. Students will analyze different web designs and use more complex web tools that may include the Apache web server, other technologies and mobile devices. Students in this class will maintain a real world website and be responsible for providing new content and functionality.

INTRO TO 3D ANIMATION
Semester Class (2 period block) 10-12 grade
This semester course offers an entry-level study of the basic principles of 3D and 2D animation. Subject matter includes: 2D animation, timing, secondary motion, stretch & squash, basic 3D modeling, texturing, lighting, UV mapping, rigging and animating a model. This course emphasizes artistic principles for those students interested in the 3D Industry. Students will learn basic principles such as layout and design, color theory, and basic drawing skills. In addition, animation planning, storyboard development, and the production process will be a large part of the course.

ADVANCED 3D ANIMATION
Semester Class (2 period block) 10-12 grade
Prerequisite: Intro to 3D Animation
This semester course offers an advanced level study of the principles of 3D and 2D animation. This course is designed to prepare students for entry into an internship or a college course with the skills necessary to succeed in industry. Subject matter includes: advanced polygonal modeling, nurbs modeling, and advanced techniques for both game and movie industries, advanced lighting and texture, dynamics, environmental construction, advanced character rigging and animation. This course expounds on the instructional principles taught during the Intro to Animation class, but gives more time for student projects and critique. Students will continue to apply the art principles learned during the intro class, and the principles will be critiqued and applied to their final projects. Students will have the opportunity to work with Utah Valley University and Salt Lake Community College and interface and work with college professors to seamlessly transition into college and their desired field of study.

GAMING DEVELOPMENT FUNDAMENTALS
Semester (2 period block) 10-12 grade
This course is designed to provide students with knowledge and project based experience of fundamental gaming development concepts relating to STEM. These concepts include game design, scripting, creation of digital assets, graphic resources animations, understanding hardware, problem solving, and critical thinking, collaboration, and project management.

$15 Course fee required per semester
DIGITAL MEDIA II (Projects class)
Semester (2 period block) 11-12 grade
Prerequisite: Advanced 3D Animation $15 Course fee required per semester
This semester course offers seniors an opportunity to create and complete a portfolio necessary for internships, college programs and the job application process. Students will have the opportunity to work with real world situations, producing products for both the school district and local businesses, helping to give substance to their portfolios. Students will be critiqued every two weeks to measure their progress, quality of work, and to receive direction as to the overall layout, design and professionalism of the end product. This class is designed after a senior level college studio class to prepare students for what they will encounter in college. In addition, this course will help students complete all necessary paperwork for entrance into college or an internship program. Students wishing to take this course must make individual arrangements with the instructor.

COMPUTER MAINTENANCE (A+) CERTIFICATION
Semester (2 period block) 10-12 grade $15 Course fee required per semester
In this course, students practice troubleshooting, maintenance, and upgrade of PCs. Course content covers setup, memory management, data back-up, and hardware/software diagnostic procedures. The course is designed to prepare students for the Comp TIA A+ certification exam. A+ certification is a testing program that certifies the competency of entry-level (9 month’s experience) service technicians in the computer industry. Earning A+ certification means that the individual possesses the knowledge, skills, and customer relation skills essential for a successful entry-level computer service technician as defined by experts from companies across the industry. This course prepares students for the CompTIA 901 & 902.

LINUX FUNDAMENTALS
Semester (2 period block) 10-12 grade $15 Course fee required per semester
This semester course introduces students to the Fedora 20 Linux operating system. Students will learn initial concepts, installation, administration, system management, and X-window system, TCP/IP, SAMBA for both workstations and servers. This course also prepares the student for the CompTIA Linux+ certification exam.

NETWORKING +/CISCO (CCENT CERTIFICATION)
Semester (2 period block) 10-12 grade $15 Course fee required per semester
This course focuses on basic networking terms and concepts, the OSI model, transmission media, and protocols used by various vendors in LAN and WAN network implementation. This course is designed to prepare students for the CompTIA Network+ certification exam and is equivalent to 6 months of full time experience working with Peer-to-Peer and Server Client networks. Also, students will be introduced to CCENT (Beginning Cisco Certification). Students will learn to describe the operation of data networks, implement small switched networks, implement an IP addressing scheme and IP services to meet network requirements for a small branch office, implement small routed networks, explain and select administrative tasks requires for a WLAN, identify security threats to a network and describe ways to mitigate those threats, and implement WAN links.

SECURITY +
Semester (2 period block) 10-12 grade $15 Course fee required per semester
This course will prepare you to successfully pass the CompTIA Security+ Exam SYO-401. CompTIA Security Certification covers network security, compliance and operational security. Also, included is… access control, identity management, and cryptography.

TECHNOLOGY & ENGINEERING
The engineering technology program is a hands-on, project-based approach to learning that better prepares students for entrance into college engineering and/or engineering technology programs. Coursework uses real-world problem solving that answers the age-old student question, “Why do I need to know this?” There are five courses in the Engineering Technology Sequence. Course content is designed to help students explore how engineers and engineering technicians integrate math, science, and communications skills into their profession. Engineering Technology students will engage in the research, design, and construction of models/prototypes in a variety of areas including: electrical, fluid, structural, and mechanical systems.
ARCHITECTURAL DESIGN 1 & 2
 Semester (2 period block) 10-12 grade $10 Course fee required per semester
Architectural Design 1 taught 1st semester, Architectural Design 2 taught 2nd semester = Year long class
If architecture, building construction, interior design, or civil engineering is your interest then this is the class for you. In this class you will learn the process of residential and commercial building design. Students will learn design and construction practices common to architecture. Students will gain knowledge in uniform building codes, blueprint reading, and architectural history. A focus will be placed on sketching, 2D and 3D CAD (Computer Aided Design) drawing. Students will practice using AutoCad and Revit, which are the most commonly, used design software packages used in the industry by Architects.

ENGINEER/TECHNICAL DESIGN 1 & 2
 Semester (2 period block) 9-12 grade $10 Course fee required per semester
Engineer/Technical Design 1 taught 1st quarter & Engineer/Technical Design 2 taught 2nd quarter = Semester class
This exploratory class will introduce students to the process of engineering design. Students will focus on the language of engineering, which includes sketching, technical drawing, orthographic projection, geometry, dimensioning standards and drawing presentations used by industry. Students will be instructed on 2D and 3D CAD (Computer Aided Design). Students will practice with the latest CAD software used in the field including AutoCAD, Solid Works and Solid Edge as they complete hands on projects. ENGINEER/TECHNICAL DESIGN 3 available 2nd semester.

ENGINEERING PRINCIPLES 1 & 2
 Semester (2 period block) 10-12 grade $15 Course fee required per semester
Thinking about Engineering? Learn the ways Engineering impacts the lives of individuals. Identify successful Engineering design processes, then develop fun hands-on projects. Find out how you as a Civil, Computer, Electrical, Bio, Chemical, Materials, or Mechanical Engineer can enhance the health and well-being of individuals. You will apply your basic math and science knowledge in hands-on projects for each engineering discipline. Engineering field trips happen, meet real Engineers. Develop the skills required in today's workplace. This course may also be taken to fulfill a CTE or third science credit.

ENGINEERING CAPSTONE (Projects class)
 Semester (2 period block) 11-12 grade $15 Course fee required per semester
Prerequisite: Robotics and Automation
Students will develop product using the engineering design process. The course will require the use of 3D computer aided design (CAD) software, 3D prototype, model machinery (3D printer), and other shop equipment to design, prototype, and test their product. This course may also be taken to fulfill a third science credit requirement. Students wishing to take this course must make individual arrangements with the instructor.

ELECTRONICS 1 & 2
 Semester (2 period block) 9-12 grade $15 Course fee required per semester
This course covers basic electronics theory and logic for DC & Digital Electronics. Students will use computer simulations to learn about the logic of electronics as they design, test, and actually construct circuits and devices. This is a course in applied logic that encompasses the application of electronic circuits and devices. This course may also be taken to fulfill a third science credit requirement.

ELECTRONICS 3
 Semester (2 period block) 10-12 grade $15 Course fee required per semester
Prerequisite: Electronics 1 & 2
Students will use computer simulations to learn about the logic of AC and Advanced Digital electronics including interfacing Raspberry Pi computers. Also, they design, test, and actually construct circuits and devices. This is a course in applied logic that encompasses the application of electronic circuits and devices. This course may also be taken to fulfill a third science credit requirement.
COMPOSITES 1  
*Semester 11-12 grade*  
(Taken with Manufacturing Principles 1 = 2 period block)  
$20 Course fee required per semester  
Strength, stealth and speed – these are key words related to the composites industry. This course focuses on the properties and manufacturing of fiberglass-reinforced plastics and advanced composites. Composites 1 is the first in a two-part sequence of courses focusing on advanced materials and processing used in planes, cars, bicycles and many other products. The courses in this pathway include Manufacturing Principles 1, Manufacturing Principles 2, Composites 1 and Composites 2. These courses lead to entry-level technician positions in industry and are appropriate for students desiring college preparation in engineering.

MANUFACTURING PRINCIPLES 1  
*Semester 11-12 grade*  
(Taken with Composites 1 = 2 period block)  
$20 Course fee required per semester  
The first in a sequence of courses offering “hands-on” experience producing useable items from wood, plastic, and composite material rough stock that meet a given set of design specifications. Students will use basic tools, equipment and operations found in manufacturing industries. Students will create engineering drawings, use precision measuring instruments, manufacturing equipment, machines, and materials to improve an existing design or manufacture original products. Products will comply with quality control standards. This course allows students to experiment with new technologies and assess application of processes, materials and products.

COMPOSITES 2  
*Semester 11-12 grade*  
(Taken with Manufacturing Principles 2 = 2 period block)  
$20 Course fee required per semester  
Prerequisite: Composites 1  
The course work for Manufacturing Principles includes discussion and work in the following areas: History and future of Advanced Composites, Systems and methods of production, Engineering problem solving, Employment possibilities, Safety and work standards, Product development, Design and manufacture individual projects, Marketing and mass production. Approximately 75% of the time is spent in the lab working on exercises and projects.

MANUFACTURING PRINCIPLES 2  
*Semester 11-12 grade*  
(Taken with Composites 2 = 2 period block)  
$20 Course fee required per semester  
Prerequisite: Manufacturing Principles 1  
The course work for Manufacturing Principles includes discussion and work in the following areas: History and future of Advanced Composites, Systems and methods of production, Engineering problem solving, Employment possibilities, Safety and work standards, Product development, Design and manufacture individual projects, Marketing and mass production. Approximately 75% of the time is spent in the lab working on exercises and projects.

ROBOTICS 1  
*Semester (2 period block) 10-12 grade*  
$15 Course fee required per semester  
Prerequisite: Engineering Principles, Engineer/Tech Design  
Robotics & Automation is a lab-based, hands-on curriculum combining electrical, mechanical and engineering principles. Students will learn to design, build, program, and control robotic devices by applying science, technology, engineering and math concepts. Engineering concepts will include: mechanical design, prototype development, design testing, programming, and proper engineer documentation. Industrial automation, robotic applications and career opportunities will also be discussed.

ROBOTICS 2  
*Semester (2 period block) 10-12 grade*  
$15 Course fee required per semester  
Prerequisite: Robotics 1  
Robotics & Automation is a lab-based, hands-on curriculum combining electrical, mechanical and engineering principles. Students will learn to design, build, program, and control robotic devices by applying science, technology, engineering and math concepts. A rigorous study and application of electrical concepts will include: sources of energy, electrical safety, use and identification of basic electronic components, sensors and actuators. Engineering concepts will include: mechanical design, prototype development, design testing, programming, and proper engineer documentation. Industrial automation, robotic applications and career opportunities will also be discussed.
